MONT-MORE CHERRY

(An Early Bearing Dwarf Montmorency)

Often BEARS THE FIRST YEAR
Here's the best news in cherries, we've heard for years. This was a sport from a Montmorency THAT WAS FOUND TO BEAR A CROP THE FIRST YEAR!

DWARF—EASY PICKING

It's unusual in that it grows much lower than Montmorency—about 8 to 12 ft.—and still produces a full-sized crop. Trees never get so tall but what fruit can be picked from the ground. Perfect for restricted backyards.

BIG CROPS IN 3 YEARS

Ideal commercial cherry. Gets in full bearing within 3 or 4 years. Fruit is often larger than Montmorency and will bear anywhere from Georgia as far north as cherries will grow. Absolutely hardy.

Henry Field's Improved Strain of HANSEN'S FAMOUS BUSH CHERRY

Loaded with Delicious Fruit

THE IMPROVED BUSH CHERRY

This improved Bush Cherry strain is almost a miracle plant. Grows like a bush (4 to 5 ft. high). Makes beautiful ornamental shrub. Bears almost as much fruit as a plum tree. No waiting for fruit. Bears huge clusters of large sweet cherries (shaped like plums) first year.

GOOD EATING AND HARDY

This new strain makes it better eating than ever—fresh, canned, or in preserves. Very hardy, too. Stands intense heat and cold. Plant 3 to 4 ft. apart.
Price: Select plants, 19c each; 3 for 49c; 6 for \$1.00, postpaid. Extra select plants, 24c each; 3 for 69c; 5 for \$1.00, postpaid.

Field's GIANT BUSH CHERRY (Red Fleshed)

Now a new Bush Cherry as loaded as the regular bush cherry, but giant (plum size) fruit—all rich dark purplish red skin and flesh. Best looking fruit I've seen. Good eaten just like plums or cooked or canned same way. Grows 4 to 6 feet. Plant 6 feet apart. Will produce more fruit in small space than anything I know. Sold only by Field's as supply is limited.
1 1/2- to 2-ft. plants, 39c each; 3 for \$1.00. 2-ft. plants, 59c each; 2 for \$1.00, all postpaid.

The Marvelous ONE TREE ORCHARDS

3 to 5 Fruits on ONE TREE!

They said it just "couldn't be done" but here you are. Now every one, even with a tiny yard, can grow their own fruit. Science has made it possible now to grow several varieties of fine fruit on ONE tree. **THINK OF IT!** Bear a full crop of fruit, each limb bearing a different KIND OF FRUIT! One of the most interesting novelties I've every offered in over 50 years in the nursery business. Bear very young as their roots are all large. Very scarce, order now.

3-IN-1 PLUM

A new combination—3 Hansen Hardy Plums on one tree. I think 3-N-1 Plum will bear heaviest of all multiple fruits. Waneta, Hanska, Opata, all on one tree—a grand sight when loaded with 3 kinds of plums and a real lot of fruit. You'll enjoy these big 4 ft. trees. Everybody should plant at least one. Price: 69c each; 2 for \$1.19 postpaid.

3-IN-1 CHERRY

Three absolutely different kinds of cherries on one tree—sweet cherry, early cherry and mid-season cherries. You can have black eating cherries and bright red cherries for pie. Varieties are Governor Wood, Sweet, Early Richmond and Montmorency sour cherries. Heavy trees each \$1.19; 2 for only \$1.98, postpaid.

PEACH-PLUM-APRICOT TREE

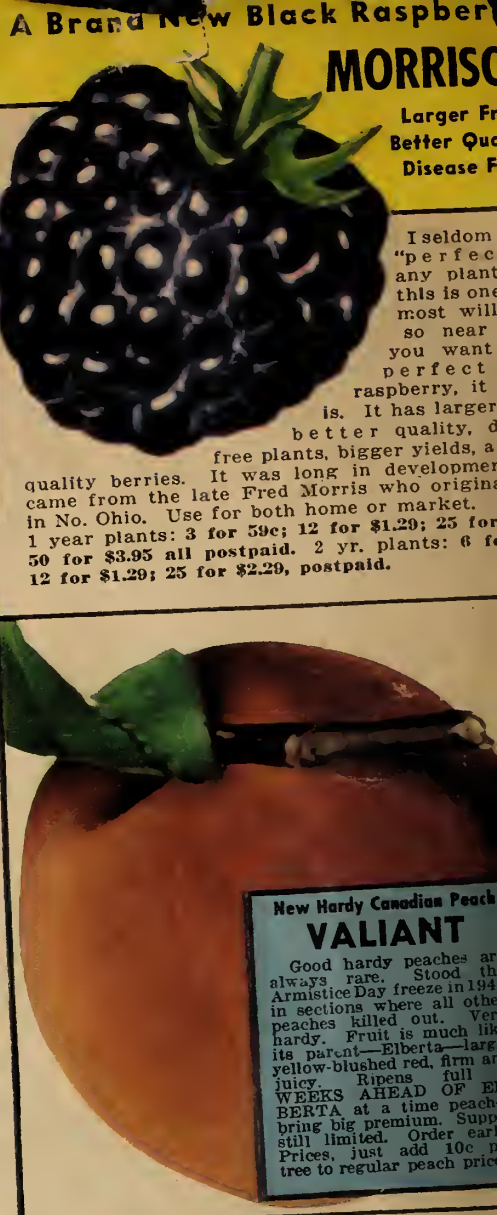

Three separate and different kinds of fruits on one tree. You'll have Elberta peaches, big golden yellow ones. Early Golden apricots and Burbank Plum all on one beautiful tree. Truly a sight, both in fruit and bloom. Big 1/2 trees soon ready to bear, 79c each or 2 for \$1.39, postpaid.

THE MARVELOUS 5-IN-ONE APPLE

The miracle tree. It bears 5 different Apples (that come on all season long) ON ONE TREE! Think of it! An ideal tree for the small yard, but thoroughly practical anywhere. Bears these five choice varieties on one tree:

- ANOKA
- YELLOW TRANSPARENT
- DOUBLE RED DELICIOUS
- YELLOW DELICIOUS
- STAYMAN'S WINESAP

Trees are all heavy rooted. Will bear very young. Supply short but while they last will sell them cheap. Last year sold out before April 1st, so order early.

Good hardy peaches are always rare. Stood the Armistice Day freeze in 1941 in sections where all other peaches killed out. Very hardy. Fruit is much like its parent—Elberta—large, yellow-blushed red, firm and juicy. Ripens full WEEKS AHEAD OF ELBERTA at a time peaches bring big premium. Supply still limited. Order early. HENRY FIELD'S SEED SENSE

"FOR THE MAN BEHIND THE HOE"

Vol. XXVI

SPECIAL CATALOG EDITION—Shenandoah, Iowa, Jan. 1, 1942

No. 1

SOME HENRY FIELD CUSTOMERS AND WHAT THEY GREW!

Growing a Garden Is Not Only Great Fun, But It's Mighty Profitable too. See What Your Neighbors Are Doing in the Gardening Line.

Gardening the Easy Way

Here's Henry Hartwein of Overland, Kansas, showing you folks how to garden without breaking your back. Get out a garden cultivator and save yourself 9/10 of your work. These are tomatoes from my seed.

Used Field's Seeds 24 Years!

"Dear Henry: I have used your garden seed for the past 24 years and always raise a good garden even when my neighbors fail. Last summer, I canned about 700 quarts of good things besides all I sold and raised 300 pounds of dry navy beans for winter use."—Mrs. J. B. Krisvelt, Cleveland, Okla. That should give you folks some ideas about cutting your cost of eating.

Another Satisfied Customer

"Dear Henry: Here's a picture of my wife beside a Mock Orange bush we bought from you 7 years ago. It was simply a snowbank of bloom on June 12th."—Chas. Stollenberg, Garretson, S. Dak.

Raised 94 Out of 100

Field's chicks get praised by our customers right along, too. Here's a picture sent in by Mrs. E. E. Fischer, of Harris, Mo., showing her son, Bobbie, with some of our White Giant Cockerels. Though they don't have a brooder, they raised 94 out of 100 with a lantern in their dog house. It takes good chicks for that. And Bobbie is going to pay for a clarinet with his share of the profits.

Field's Seeds in Colorado

Yes, they make good gardens out in Colorado, even though the elevation is 8,000 feet where these were grown. This is C. S. Planalp with two heads of Iceberg lettuce grown from Field's seeds. How do they look to you? You can grow them like this, if you try.

All This from 1 Seed

"Dear Mr. Field: I received one of your conglomeration penny packets and it had one bean in it. I planted it and raised about 250 beans. Last year, I planted them and raised 2 bushels even though the dry weather struck. Your seeds sure grow."—Herman Sharp, Whitener, Ark.

From a Field Aster Packet

Here's a sample of what a packet of flower seeds will do. Mr. and Mrs. H. H. Linke, of Eustis, Nebr. grew these from my seed and sent in this picture of themselves. That many flowers bought at a florists would probably break you, but you can have them all for a nickel or a dime, if you take the trouble to plant this spring.

100 Bu. Per Acre

Here are the last two loads from Robert Terwilliger's field of our Mule-Hybrid that went over 100 bu. per acre. Terwilliger said it would average better than that for his entire field and now he's another convert to Mule-Hybrid. There's no use paying \$8 and \$9 for hybrid when you can buy Mule-Hybrid DIRECT and pocket the difference with a better yield in prospect, too.

Picking from 1 lb. Planting of Seed

"Dear Henry: I am sending a picture of myself and neighbors with the peas we picked from 1 lb. of your pea seed. I don't remember the name, but they are extra large and very good. We have several meals from the patch also. I only have 1 lot in garden, but have enough for the neighborhood. Peas in the picture canned 51 pints. Left to right: myself, Mrs. Walker, Mrs. Kess, Mrs. Barnett, and Mrs. Chase. We didn't dress up for the picture—just took off our hats and had picture taken as we came from the pea patch."—Mrs. T. W. Bowers, Lincoln, Nebr.

Field's Nursery in Wyoming

That Spirea Van Houttei Mrs. Packard of Lander, Wyoming, got from me really is a beautiful sight, but little Elaine Packard is running it tough competition. That's a combination hard to beat—plenty of children and flowers.

Part of 19,000 Melons!

When big gardeners like Grant Strain of White River, So. Dakota uses only Field's seeds, you couldn't ask for better proof of the seeds merit. He raised 19,000 melons last year, he says, and that's some crop.

50c Each for Pictures

I always need pictures. Can't put out a Seed Sense or Catalog without them. Especially of your Mule-Hybrid corn crib or you holding some ears and your chicks. And always want those snaps of your garden and flowers, and children and family groups or snaps of anything interesting.

If I can use them in the catalog or Seed Sense, I still pay 50c each when I do. The only rule is, they must be extra prints that you don't want back for I never know which I can use till each Seed Sense time. Best one sent in of all, gets \$5. Fair deal? Well then get them in. You enjoy seeing what others are doing—well, they enjoy seeing what you are doing just as much.

30 Pints from 1/2 lb. Seed

"Dear Mr. Field: This is a picture of my harvest of peas from only 1/2 lb. of your Improved Fillbasket Peas. I raised 30 pints. The pods were all uniformly long and well filled. I am very well satisfied with all Henry Field Seeds."—Mrs. Paul Mordin, Glum, Minn.

MY OWN CORNER for "JUST VISITIN' "

The Boss Himself, out picking "Missouri Giant" Blackberries.

like about the seed-business most, is the friendly letters I get from you folks. Most all of the letters have questions in them about planting or seeding and I'm glad to answer them all I can. That's what we're here for to be of help to you.

The almighty dollar isn't the most important thing in the world, but being of help to each other is.

This year I want you to make the biggest garden you have ever made. The government is encouraging you to do your share in raising your own fruit and vegetables. It will be a big help to the country in this emergency. And it's a big help to your pocketbook, too. This is the year of all years to garden and raise all you can. Even though you haven't a yard bigger than a blanket, you will surprise yourself with the amount of truck you can grow off of it. And don't forget to set some fruit trees, and berries and other garden stuff too. You'll live in plenty, if you'll just do a little planting.

Now I won't bother you any more. Go ahead and read the catalog and fill out the order sheet in the back, and send it along. We'll give you prompt service and the best seed in the world. It takes orders to keep the business going, so send them whether they're big or small.

January, 1942

P.S.—This year there are some shortages in some garden seed items and many hybrid corn numbers and some field seed items, so please get your orders in as early as possible to avoid any possible disappointment. H. F. And don't forget Seed Sense is free to all customers who send an order.

Most generally, the picture that I put of myself here in this corner of mine, is one of me at the desk working at writing you letters or some such kind, but this year the boys here at the seedhouse made so much fun of me, I didn't do it. They said, "You are most generally out in your garden or the trial grounds or in the nursery field so why don't you put in one like that that's more natural?" So I did. How do you like it?

And though this corner of mine is not for selling but just for plain visiting and gossip, I can't resist telling you that picture was taken of my own Missouri Giant Blackberry—one of the heaviest yielders and best tasting berries I've seen in fifty years of raising them. You ought to try it.

This corner is for chinning and gossip where I don't have to worry about punctuation and grammar like I do in the rest of the pages.

We've had an unusually good year. I take part credit for that because I know the perpetual watching we do to see you get the best seeds and plants in the world makes you come back for more. But I give most of the credit to you folks. Most everyone of you has told 2 or 3 of your friends about me and they've sent me orders. That's what has made our business, double then triple. People are coming to headquarters for their seed.

I think I've got the finest bunch of customers in the world. Always have and always will. As long as they keep on doing favors for me, I'll stay in the seed and nursery business giving them the best stock it's possible to grow.

And how have you been? Many of you have written nice long letters and told me about yourself, your garden and family but some of you haven't. If you haven't, I wish you would. I think that's what I

Henry Field's "Wagon Box" Spots

You've heard the expression, "Spots before your eyes" and perhaps you have had them. Well, this time you have high class Spots before your eyes. Look them over. I don't think there is a better lot of stock pigs in the country than these. Look at those hams—those backs. We have sold going on to a thousand head just about like them in the last year. They are real farmer pigs, raised farmer style.

The two on their hind legs are H. F. himself and "Stew" who helps in the Garden Seed and Hog departments.

Hog Farm Corner

For over 50 years I have been telling you the same thing about hogs. Namely: Good hogs are always "money makers." Thousands of my farmer friends will back me up when I say there is nothing like a good sow to pull you out from under a mortgage.

I am still sticking to my original ideas of a farmer type pig. I want easy feeders, thick, blocky and low down, plenty of bone and early maturing quality. You have probably heard of "Wagon-Box" hogs—well that's what I am talking about and that's the kind I have. It is plenty hard to find pigs like that everywhere, but you will find lots of them in my herd. I have shipped Henry Field "Wagon-Box" Spots to some of the most critical breeders and farmers from one side of the country to the other and I satisfied them too.

Plenty on Hand

With heated farrowing houses, we have pigs coming on the year around. We usually have plenty of breeding stock of all kinds at all times. Write me what you are in need of.

Guaranteed to Please

Every deal with Henry is guaranteed. I sell more hogs through the mail than I do over the fence. Of course, we like to have you come and pick out your own pigs, but if you can't come, write me a letter. Tell me what you want and you can be sure your order will be taken care of just as well as if you were right here helping the boys crate and load them.

FIELD'S FAMOUS COFFEE BLEND

Years ago, I couldn't find a coffee that quite suited me, so I had a special blend of the best coffees roasted just to my taste. I believe in good coffee—rich and full-bodied and I found the only way to get it was to have it made to order.

My Own Private Blend

The blend I worked out proved so popular that gradually my customers from all over the country asked me to supply them some. Now thousands of customers from all over the United States send regular to me to get their coffee supply. I have no patent on it and am glad to share it.

Brought In Fresh Every Week

A new supply is roasted and sent to me each week. Coffee should be fresh and that's the way I get it. It's packed in a special "towel" bag, which serves as a towel after the coffee is used up. Women like that.

Fully Guaranteed

If you haven't used my coffee, you have a real treat ahead of you. And I want you to try it. Just send your order in and try it once. I guarantee it to taste better, make more cups per pound and please you better than any other coffee regardless of price or it won't cost you a cent. If it doesn't, send it back and I'll refund every cent. If you want a stronger guarantee, write it yourself and I'll stay hitched.

My Nursery Guaranteed

It's foolish to buy cheap, second-grade nursery stock like is sometimes offered for sale. You might save 10c, but 5 years later when the tree is supposed to bear apples and bears just leaves instead, you'll wish you hadn't fooled with it.

I don't fool around with sickly, cheap nursery stock. Everything that isn't first-class, heavy-rooted, and of the highest-quality is thrown out and burned. That's why I'm able to guarantee my nursery stock with this iron-clad guarantee: This guarantee alone, is reason enough to buy your nursery stock of Henry Field. I guarantee everything to reach you in first class, live growing condition. If you're not pleased in every way, notify me within 5 days and I will replace it at once. After that, up to October 1st, we take half the blame (weather one-half) and replace at half price anything unsatisfactory through any fault of the stock. Fair enough, isn't it?

Double Stand with Field's Seeds!

"Dear Mr. Field: I have been buying seeds from you since 1914 when I made a garden and my husband remarked once he believed two plants came from every seed planted. Of course, that is a joke, but it is no joke the way they grow. I do enjoy your Seed Sense, the catalog and all I shall always feel grateful to the neighbor who loaned me a catalog when I told him my seeds wouldn't grow." He said that he would guarantee yours.—Mrs. W. M. Cope, South Bend, Washington.

General Tips

Before plowing burn the rubbish and dead vegetable vines as they may carry disease or injurious insects.

Apply a good coating of manure if you can get it. Tree leaves are also fine.

Some gardeners say cover the seed four times its greatest diameter.

Seed can be planted deeper on loose mellow soil than it can on clay or gumbo.

The same seed should be planted deeper late in the season when the soil is warm and more likely to dry out.

After planting very small seed, especially among the flowers, cover with a mulch to hold the moisture near the surface until the seed sprouts.

Plant some for the worm; some for the crow.

Some to pull out and some to grow.

Plant abundantly. Enough for yourself and some to spare.

Crop Succession

Plant radish seed very thin and follow at once with parsnip, carrot, parsley, asparagus, onion or leek right in the same row. Pull the radish and use when it is large enough.

Plant Beets, Kohlrabi, Lettuce, Mustard, Spinach, Onion Sets, Radish or early Beans or Peas between rows of late cabbage, Melons, Squash or Tomatoes.

Plant radish very early followed by early Cabbage plants set every two feet in the row and after the cabbage is off sow late turnips or Chinese Cabbage.

Winter Storage of Vegetables

Most of the germs that cause decay like a high temperature and a damp poorly ventilated place.

Beets, Cabbage, Carrots, Parsnips, Potatoes, Salsify and Turnips must have more or less moisture and a temperature just above freezing.

Squash and Sweet Potatoes like a rather warm dry atmosphere. Temperature say 50 or 60 degrees.

Onions just above freezing and dry and good ventilation.

As a rule an outdoor cave or cellar is best for root crops.

For Squash, Onions and Sweet Potatoes a house cellar will likely be best.

Bush Beans—See Chart

Pull snap beans while tender and an hour or so before you use them and they will have a better flavor.

Do not cultivate when plants are wet with dew or rain.

(Save This Chart—It Will Prove Helpful)

Above directions suitable for small Limas.

Navy beans should be planted late, say June.

Use 20 to 30 pounds of seed to the acre.

Large Bush Limas—See Chart

All Limas require rich soil. Do not plant until ground is thoroughly warm. Wait until after corn planting time.

Cover two inches deep.

One pound of seed to 100 feet of row. Rows not closer than 18 inches or 2 feet apart. Thin to ten or twelve inches apart in row.

Can a few for winter use while they are green.

Pole Beans

Plant when soil is warm in hills 3 to 4 feet each way, covering seed 2 inches deep. 1/4 pound of seed to 75 hills.

SOME PLANTING TIPS

TO HELP YOU

GROW YOUR OWN GROCERIES

Doesn't Look Like We'll Go Hungry

Doesn't look like we'd ever run out of something to eat, does it? And really there's no reason why anybody with a little ambition and a few dollars worth of seed should ever go hungry, if they'll just put up what mother nature will grow for them. And they'll set a mighty good table, too. Of all years, this is the year to grow our own food and cut down our own food bill, thus liberating other food for our armed forces.

This was taken down in our Ozark cabin and that's Mrs. Field who has done 90% of the work though I help, too. We have a duplicate set like this here in Shenandoah, too, of course.

Stick a slender pole, six to eight feet long, beside each hill and draw the tops of four of them together wigwag fashion and tie them.

Table Beets—

See Chart. Beets have best flavor when about half grown.

Make several plantings for the season's supply. Last planting about July first.

Use the plants thinned out for greens or transplant some of them. Store after frost, in a pit, cellar or cave where they will keep cool and moist enough to prevent drying out. Use the tender half grown beets for canning.

Help the plants resist the attacks of insects and disease by planting on rich soil. Use plenty of Bug Dust.

Egg Plant—See Chart

Figure 1500 plants from an ounce of seed and 150 from a packet. Seed slow to sprout.

Do not plant too early. Egg plant should be the last spring crop planted in the garden.

Lettuce—See Chart

Thin to 12 inches for the head varieties and 6 inches for others.

It can be planted in the fall just before freezing weather and it will come up very early in the Spring or started in the hot bed and transplanted to the field later.

Loose leaf lettuce is easiest grown. All lettuce does better on rich soil especially head lettuce.

Lettuce is a cool weather plant and is crisp and tender early in the season.

Muskmelons—See Chart

Plant when ground is warm in hills 3 x 6 feet, covering seed one inch deep and thin later when the bugs are gone to one plant every three feet.

Or space hills 6 x 6 feet and thin later to two plants to the hill. Figure 85 hills to ounce or 30 hills to the packet of seed.

Look on the underside of the leaves, about time they begin to vine, for lice. Dust or spray with Bug Dust.

Muskmelons are ready to pull when a crack appears around the stem.

The melons are best if gathered early in the morning while cool.

Onion Plant Culture

The plants should be transplanted as early as possible. A light freeze will not hurt them.

Space the rows any convenient distance.

Carrots—See Chart

Seed sometimes slow to sprout so be patient. Cover the seed shallow and plant thick.

Store in a pit, cave or cellar where they will keep cool and moist enough to prevent shriveling up.

Some pack in dirt or sand and moisten occasionally.

Celery—See Chart

Start early either in the house or hot bed or in the field later on.

Celery seed sprouts slower.

Cover shallow and keep surface soil moist until plants are up.

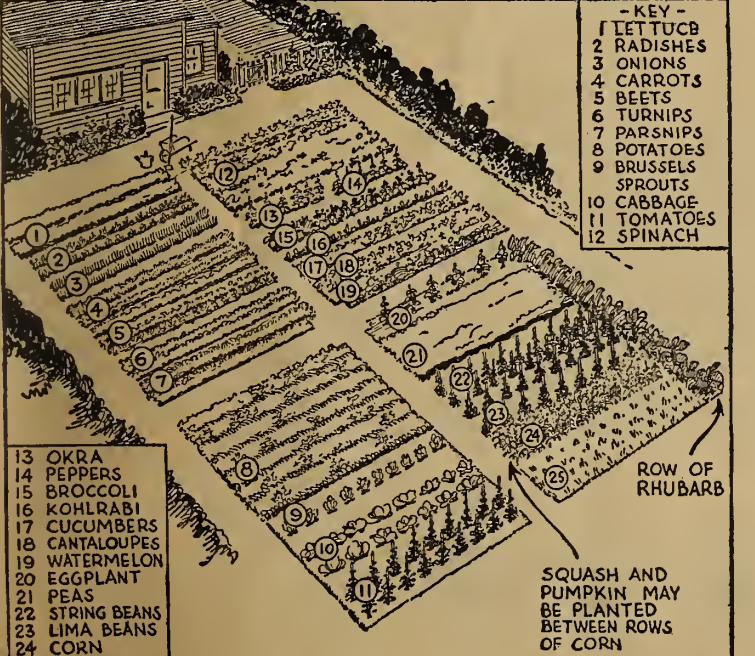

To allow plenty of room, thin out and transplant when quite small. When four or five inches, transplant to field.

Space plants four to six inches in the row. Rows four to six feet apart if you use dirt for banking up. Three feet apart if you use boards.

When plants are ten or twelve inches tall begin drawing in dirt to them drawing the leaves together.

As the plants grow taller pull up more dirt always leaving leaves exposed.

Some bleach with a section of a drain tile or by wrapping plants in heavy building paper.

Early Cabbage and Cauliflower

See Chart. Plant the seed in the house or hot bed six weeks or more before you set in the field, covering seed about one-half inch deep.

Cauliflower will not head during hot dry summer weather so must be started early.

Real early or real late plantings will not be troubled with worms very much.

Late Cabbage—See Chart

Plant in cold frame figuring 2500 plants to an ounce of seed, or drop in hills 3 x 3 feet or drill where plants are to stand at the rate of 1 pound to the acre.

To mature late crop, figure 120 to 150 days from seed. Most folks plant their late cabbage too early.

It saves a lot of hard labor and you are surer of getting a stand if seed is planted in field where crop is to be grown.

Cucumbers—See Chart

Plant when ground is warm in hills 3 x 6 feet covering seed 1 inch deep. Drop about a dozen seeds to the hill and thin later when bugs are gone to 2 plants in hill. Figure 100 hills to the ounce or 35 to the packet of seed.

Gardening Is Profitable and Healthy

By all means, get out and grow your own groceries this year. You'll not only save \$ \$ on your grocery bills, but you'll be better off physically, mentally, and morally for doing it. Besides this, you release other food for our armed forces and do your part for the nation.

Above is a Henry Field gardener, Mrs. J. L. Hovey and grandchildren of South Fork, Mo., out doing her part.

Onions—See Chart

Onions do most of their growing before hot weather so get them in early.
When onions are as large as a straw, thin and weed.
When tops fall down pull and throw in windrows and allow to cure two or three days.
Store temporarily in shallow piles or slatted crates under cover.
If not harvested until a wet spell of weather it causes second growth and they will not keep well.
Use sets to grow bunch onions from, as many will not make a large bulb but will go to seed.

Parsnips—See Chart

Plant early in rows 15 inches apart, covering the seed from one-half to three-fourths of an inch deep.
Thin later to 4 or 5 inches in the row. One ounce will drill 200 feet, one packet, 50 feet.
Parsnip seed sprouts better earlier in the season when the soil is cool and moist. Sprouts slow.
To mark the row so that you can cultivate before the plants are up, scatter a few radish seed along with the parsnip seed.
The radish will come up first and when they are large enough, pull and use.
Store in a shallow pit where they will freeze, for freezing improves the flavor.
Or you can leave them in the ground, where they grew, until spring.

Peanuts

Plant when the ground is warm in rows not closer than 2 feet apart. Drop two kernels every 12 inches in the row.
Shell before planting but do not break the brown skin covering the nut.
Cultivate same as for beans. Do not cover the bloom.
Harvest after frost and thoroughly dry before storing.

Peas—See Chart

One pound of seed should drill 100 feet of row.
To get that delicious flavor use peas within two or three hours of the time they are picked.
You should plant both smooth seeded for early peas and wrinkled varieties for later heavier yielders.
One plan is to drill two rows side by side about 8 inches apart with 2 feet between each pair of rows. This saves space and the peas stand up better.

Peppers

Plant early in the house or hot-bed and transplant to field when ground is warm.
Give each plant not less than 1 inch space in the hot-bed, rows 4 inches apart.
They like rich soil and warm growing weather.

Radish—See Chart

Plant often so that you can always have them crisp and tender.
Use them fresh from the garden before they become tough and woody.
Plant the long varieties for late spring and summer use.
Plant the winter varieties in late July when you plant late turnips and thin to at least six inches in the row.

Salsify—See Chart

Dig just before hard freezing weather and store in a shallow pit where it will freeze for freezing improves the flavor.
It is especially fine in soups either alone or with other vegetables or with oysters.

Spinach

Plant early in rows 14 inches apart, covering the seed from three-fourths to one inch deep.
Thin later to about 3 or 4 inches in the row. One ounce will drill 100 feet; one packet, 25 feet.
Plant as early as possible for it is most appreciated early in the season.
Spinach can be planted in late summer and carried over winter by mulching same as for strawberries.

Squash—See Chart

For large seeded squash figure 25 hills to the ounce of seed and for small seed 50 hills to the ounce.
Summer Squashes are delicious if used before they are a third of half grown.
Combat squash bugs by dusting with Bug Dust.

Sweet Corn—See Chart

Make an early planting and in a week or ten days another between the rows of that first planting.
For succession plant an early, an intermediate and a late variety at the same time. Or make several plantings of your favorite variety, or plant my special blend which ripens in succession.

Tomato—See Chart

Sow seed eight to ten weeks before setting in the field.
Any of the early bunch vegetables can be grown between the tomato rows.
Drive three stakes around a tomato plant and fasten a barrel hoop to them and allow the plant to grow up through. This will act as a support.

Turnips—See Chart

The early crop of turnips should be in early enough to mature before hot weather or the quality will be poor.
There is an old saying "plant your turnips twenty-fifth of July wet or dry."

Watermelons—See Chart

Drop 6 seeds to the hill and thin later when bugs are gone to 2 plants to hill. Figure 50 hills to the ounce of seed.
If you want extra big melons, keep all but two or three on the vine picked off as fast as they appear.
If you plant in hills make them not closer than 8 x 10 feet and as far apart as 12 x 12 feet or even farther, sometimes.
At this distance some growers allow only one plant to the hill.
A dull green color indicates a ripe melon and a bright green color an unripe melon.

NURSERY PLANTING TIPS—FOR FRUITS

General Planting Rules

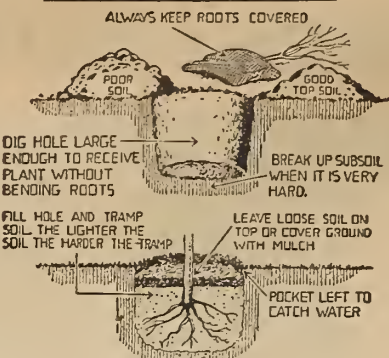

Illustration "B" Several Methods of Planting

Dig a hole large enough to accommodate the roots without crowding, and deep enough so tree can stand 1 1/2 in. deeper than it stood in the nursery row. Trim off roots with sharp knife. Loosen soil in hole and set tree, spreading roots out in a natural position. (See Illustration B.) Then, fill in some of the fine top soil, joggling tree up and down to work soil when around roots. Tramp around tree with your feet, and pack the earth real solid so no air pockets remain.

Now fill hole half full of soil using top soil first. Slowly pour on a bucket of water to thoroughly wet soil. Let settle, then fill with earth and tramp down firmly. Leave a depression around the tree to collect and hold moisture.

Cannas

Plant late in spring in rich bed. Cover with 2 inches of fine soil pressed firmly. Or dig a deep bed and place manure and fine top soil 6 in. deep below the bulbs. Water in dry weather. Cannas like sun. Plant 18 in. apart. After tops are killed by frost, dig and store in cave or cellar where dry and cool. You can cover with dry sand or sawdust.

Dahlias

Plant in well-drained sunny location, after soil is warm. Dig holes 6 in. deep 2 feet apart, and plant tuber on side with eye up and cover with 3 in. dirt pressed firmly. Fill hole gradually as plant grows.

When plant is above ground, remove all but one sprout and pinch that back when 12 to 15 in. high to force lower growth. Dig in fall after first frost. Cut tops to roots and store upside down in cool dry cellar or cave. Divide in spring and be sure to get one eye with each division.

Grapes

Dig hole big as though planting an apple tree, and use the same method. Remove part of tops and roots as shown in picture on "Top Pruning Line" and "Bottom Pruning Line." Leave two buds above surface. Set 5 ft. in rows 10 ft. apart. First year only the main stem should be allowed to grow and one vine trained each way on 2 trellis wires about 24" and 36" above ground respectively.

Prune canes in February when weather is not cold back to 2 or 3 buds (6 to 8 in. long). Fruit is produced from canes of previous seasons growth. Cut off old canes which have borne fruit.

Gladiolus

Plant 5 to 6 in. deep and 4 to 8 in. apart, in sunny location. Plant at intervals of two weeks for longer period of bloom. When tops die, dig bulbs, cut off tops and dirt and store in cool, dry place.

Iris

Plant shallow with rhizomes just barely covered with dirt. Spread roots like fingers.

Lilies

Plant all Lilies on well drained soil. Do not use manure. Plant either fall or spring (except Madonna which is fall planted). If you plant in the fall, mulch lightly to prevent freezing and thawing. Good idea to put 2 in. of sand below bulbs. Plant from 5 to 9 in. deep depending on type of soil (if light, plant deeper).

Hedging

Dig trench 10 in. wide. Set plants along straight side of trench as shown in Illustration J and a trifle lower than they were in nursery row. Trim within five inches of ground immediately after planting to give bushy growth. When new growth starts, nip off the end of each growth to stimulate branching. Set privet and other upright varieties 6 to 12 in. apart; Barberry and other bushy shrubs 1 foot apart; tall shrubs for high hedges 2 to 4 feet apart.

Illustration "J" Setting a Hedge

Roses

Plant in rich soil, well-drained, sunny location, with bud (where top joins brown root) 2 in. below the surface. Plant as suggested in the general planting directions early in spring, except dirt is mounded up 5 to 6 in. high above the plant and left about 10 days until buds start when it should be removed. Set 18 in. apart. Climbers 6 ft. Most of our roses are pruned ready for planting, but if not, cut back to just above the mound of dirt you have piled up. (4 to 5 in.) (See Illustration.) Prune back severely in late fall or early spring to within 5 or 6 inches of the ground to force new growth. (Hybrid Perpetuals should be left 15 in. long. Climbers should have wood that bloomed cut out each summer.) Mulch well in winter with small mound of dirt and then a layer of leaves and straw. All roses need good cultivation. Plant with this in mind. Watch out for suckers. Dainty Hybrid Teas are grafted onto vigorous roots and these sometimes throw up canes of their own. These have 7 leaves instead of 5 and must be cut out.

Planted Rose

Plant in rich soil thoroughly spaded. Set eye never deeper than 2 in. below the surface and plants 2 1/2 to 3 feet apart. (See Illustration.) Plant either spring or fall. Peonies are heavy feeders and should be fertilized well. Spade in manure and bone meal or Agrico way deep, below the roots. Water often. They are so easy to grow and so beautiful, plant lots of them.

Peonies

Plant in rich soil thoroughly spaded. Set eye never deeper than 2 in. below the surface and plants 2 1/2 to 3 feet apart. (See Illustration.) Plant either spring or fall. Peonies are heavy feeders and should be fertilized well. Spade in manure and bone meal or Agrico way deep, below the roots. Water often. They are so easy to grow and so beautiful, plant lots of them.

Perennials

Plant as soon as plants arrive, in good rich soil. Set so top of clump is just under surface of soil about 1/2 in. If growth has started set crown (where roots join tops) at the surface. (See Illustration.) Plant bushy growing plants farther apart than lower growing sorts. Mulch fall planted perennials with straw and leaves (never leaves alone as they will choke the plants) to prevent alternate freezing and thawing.

Vines

Climbing vines should have good soil and plenty of water. Cut back when planted and tie or stake securely. Later train to solid trellis as motion is injurious to the plants.

Raspberries

Same as blackberries. Cover roots about 3 to 5 in. deep depending on size plants you order.

Asparagus

Set asparagus 12 in. apart in rows 3 ft. apart either spring or fall. A bed dug 18 in. deep with well rooted manure for the bottom six inches, and rich top soil for the next six inches is best. Set plants, spreading the roots well and with eye up. Cover with 3 inches of soil and tramp well. Or simply plant in deep furrow.

Gradually cultivate soil into trench as plants grow so ground is level. Salt is not injurious to Asparagus, and may be sprinkled to cover the ground to keep weeds down. Dress in fall with manure. Do not cut much the first year or two after planting.

Rhubarb

Plant 3 feet apart in good garden soil so crown is 1 to 2 in. below surface of soil. Plant either spring or fall.

Strawberries

Pulverize ground thoroughly. Set plant with crown just at the surface of the earth. DO NOT GET CROWN COVERED. (See Illustration F.) Be sure roots are spread out fan shaped and hang down full length without crowding. Press soil firmly and remove dry or bruised leaves. Plant early as you can work the soil in spring. For field work set 18 in. apart in rows 3 1/2 ft. apart and in garden work about 24 in. apart each way. Mulch with 3 or 4 in. straw in fall. This mulch can be left on the following season to retain moisture and keep down weeds. Strawberry plants will not cross fertilize, so you can plant the varieties you choose. If bed is too crowded, thin out old plants. Some people let runners fill the rows and dig the old rows every two years.

NOTE:—I'm sending you the finest plants than can be raised, so you already have a big start on a fine garden. Care for them well, they deserve it.

Illustration "F"—See directions above

Shrubs

Plant as described in general instructions. Trim back within several inches of the ground after planting, to make for bushy growth. (See Illustration.) Fall planted shrubs should be mulched. Set small varieties 1 to 2 ft. apart, medium grower 1 1/2 to 3 ft.; tall grower 3 to 6 ft. apart.

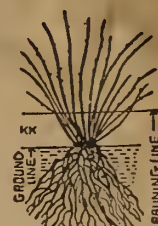

Illustration "I"

Shrubs require little pruning. In no case prune square across the top as this spoils their natural habit of growth. Cut branches off at ground. This will force young growth. Prune early blooming shrubs like Spirea V. H. and Lilacs right after they bloom. Prune mid-season and late blooming shrubs in late fall or early spring.

If planting in beds, remove all sod and spade up space between plants. In planting around foundation, stay at least 18 inches, and with large growing shrubs, as much as 2 1/2 feet away.

Blackberries

Set in good sized hole about 2 inches deeper than they were in the nursery row. Spread roots well and pack firmly. Trim back to within five inches of the ground when planting. (See Illus. E.) Set 4 feet apart in rows 7 feet apart for field cultivation. (1500 per A.) Closer for gardens.

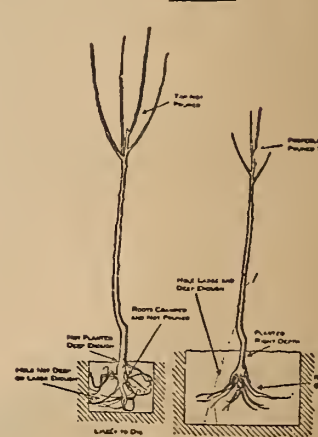

When new growth reach 24" pinch off tip to encourage branching. Next spring early trim back to 10 in. Prune right after picking the fruit. Later remove all old cane that have borne fruit and burn. Leave 3 to 5 branches on new canes. A permanent mulch may be kept on berry beds to conserve moisture and keep down weeds. Dig out any sickly bush that appears and burn.

House Plant Tips

1. Plenty of air and light are necessary for all plants. A sunny position suits flowering plants, cold draughts of air should be kept from the plants as this induces disease.
2. WATER only when plants need it and then thoroughly. Watering too much causes plants to become sickly and yellow. The bigger the plant and the more blooms it has, the more it needs water.
3. SPRINKLE the foliage or wipe with wet cloth from time to time.
4. SOIL for house plants should be one part of well-decayed earthy manure, two parts of good garden soil mixed with some clean sand. Bits of broken pottery in the bottom of pots aids drainage.
5. For APHIS use Bug Dust (it won't harm the plant); for MEALY BUGS and SCALE, scrape with stick and Ivory soap spray; WHITE FLY or RED SPIDER—Spray with water; EARTH WORMS pour on lime water which will drive worms out; OTHER BUGS—Use Bug Dust once every 10 days.

Trees

Proper Way to Set and Prune Trees

FRUIT TREES should be set as indicated in the General Planting Directions. Set Apples 30 to 40 feet apart and Peach, Apricot, Cherries, Plum and Pear, 15 to 20 feet apart. Some folks prefer to plant Apples 40 feet apart and set smaller trees such as Peach, Plum and Cherry in as filler trees. Small fruits, asparagus, and rhubarb may be planted in the orchard to give you immediate revenue.

PRUNE FRUIT TREES before planting as illustrated in picture—both roots and tops. Cut just above a bud which faces out. When properly pruned, they should not have more than 3 to 4 branches. As tree grows, remove crossed and crooked limbs. Thin out move crossed and crooked limbs. Thin out Trim apples to a central leader with limbs on different sides at different heights, peaches so they grow low (cut back leader and all branches very short), and don't prune cherries or plums except to remove broken wood.

SHADE TREES are planted the same as fruit trees. Give plenty of space. Large growers, Elm, Soft Maple, etc., 30 to 50 feet; Medium growers, Hard Maple, Oaks, etc., 25 to 40 feet. They may be set closer, if you need to. At planting remove one-third to one-half of the top. Cut out some of the small branches, shorten back the side branches, but do not cut off leader branch (main stem). Leave branches at wide angles to produce a broad head. (See Illus. M). Cut off bruised and broken roots.

BOYS AND GIRLS: Be A Junior Seedsman Win Any Premium Here or \$1.00 CASH

A CHANCE TO WIN PREMIUMS OR CASH!

You boys and girls these days are looking for a chance to make money and win big prizes. I'm going to help you by getting you into the Seed business with me.

I will furnish the seeds for your start and give you a big share of the profits. I have had as high as 30,000 JUNIOR SEEDSMEN on my list and want 20,000 more now.

You know I started in business for myself selling seeds when I was probably younger than you are now. You have read about it in the catalog. But I didn't get very far at that time, for I had very few seeds to sell and no money to buy more with, and no one to start me in business. I wish I could have had the chance you now have. I would have got a good start in the seed business about ten years earlier than I did.

HERE'S MY PROPOSITION

1. Fill out the coupon at bottom of page and send it to me and I will send you at once by parcel post 10 of the 39c collections for you to sell. You need not send the money till they are all sold, but if you do not sell them within a month, you are to return them.
2. When you have sold ten collections you get one-fourth (\$1.00) of the total for your share, either in cash or one of the premiums. By buying these premiums in big quantities and getting the manufacturers interested in my plan for starting boys and girls in business, I have made your one-fourth cover the wholesale cost of each one.
3. You send me the \$3.90 you receive for the 10 collections and tell me which premium you want, and I will send it to you at once by parcel post, except in the case of some expensive premium requiring a little more work.
4. If you would rather have your share in cash, keep out one-fourth and send the rest to me. I trust you to do the dividing.
5. In case you cannot sell the 10, sell all you can, return the rest by mail, keep one-fourth of the money and remit the rest.
6. The collections must all be sold at the same price, 39c. We believe in one price to everyone. It's the only way.

DON'T WAIT

The Sensational VITAMIN B1

Everybody is talking about this sensational vitamin for plants—Vitamin B1. The miraculous things it does when added to plant's soil are almost unbelievable!

Better Homes and Gardens who announced the discovery and have written article after article about it report 5 inch rosebuds, dahlias 10 inches across; enormous apples—all because Vitamin B1 was added to soil which is almost always deficient in this very necessary stimulant. It can be used in solution to water plants, shrubs, or trees, or the roots of plants can be dipped in it to stimulate root growth and allay the shock of transplanting.

TABLET FORM—Easy to use.

Simply dissolve one tablet in 2 or 3 gallons of water. Use solution to water flowers or to dip roots of plants in. Full directions on bottle. 100 tablet size, \$1.00; 50 tablet size, 50c, postpaid.

GREEN BEANS

And How To Grow Them

About Beans

I believe every family should plant at least five or six pounds of beans. (See my special 3 pound prices.) I always have a good supply of seed beans handy. Whenever any of the early or midseason things run out, I fill in the spaces with beans.

A pound will plant two rows 50 feet long. Start your plantings as soon as severe frosts are over and plant every two weeks until the middle of July. You will have fresh, crisp beans all season. Beans like a rich, warm soil.

POLE BEANS OR CLIMBING BEANS

One fine thing about pole beans is, they can be grown along the garden fence, and this makes them especially valuable for folks living in town who haven't much garden space to work with. For those who have corn fields, you don't have to worry about furnishing support for beans. Just plant a few climbing beans along the edge of the corn field. The cornstalks will support the beans. You will have all you can take care of, and then some. This should be of special interest to you women folks who tend the garden. Plant the pole beans in the corn field and let the corn cultivator do the tending for you. The main thing is to plant plenty of them.

Plant Fillbasket pole beans by all means. This one came from Missouri originally. My neighbor, Alf Eudy, has been growing them for more than 25 years. I had quite a time getting enough seed stock together to make a real planting, but I have plenty of stock for you now. I am proud of it and I want you to plant **FILLBASKET** by all means.

It isn't necessary for me to say anything about the **IMPROVED MISSOURI WONDER** or **KENTUCKY WONDER**. I guess you all know about them. They are both mighty fine sorts.

One of the new things in the seed line this year, is the **Edible Soy Beans** of late years, some of the food experts found out that Soy Beans really are nutritious and are deserving of a place on our table. They are a real treat too. Try a few of them this year too. Shell them and eat them while they are green just like you do lima beans. Remember pole beans will bear lots heavier than the bush beans, and they will keep on bearing until frost.

Edible Soy Beans Hokkaido

(98 days.) Edible Soy Beans are really nothing new. The Chinese have been eating them for centuries but recently we have found out the edible types of soy beans are really good. A large spotted variety, the beans are big, almost cylindrical, yellowish, nut like flavor, and a midseason variety. Good green or dried. Triple size pkt. (3 oz.) 15c; ½ lb. 25c; 1 lb. 45c, postpaid.

LIMA BEANS

I've listed Lima Beans pretty much together in the catalog, both the dwarf bush variety, and the pole or climber. They are all good. Everybody ought to plant lima beans. Years ago only those in the middle or southern states had them, but we have developed new early types which will succeed away up into Canada. Don't plant Lima Beans until after the frost danger is past. They like rich soil. Plant the beans 6 to 8 inches apart and rows 2 to 3 ft. apart. Cover ½ inches deep. When you plant Pole Limas in a hill, space the hills 4 ft. apart. Here at our place we often tie four poles together at the top and make sort of a tepee. When I drive in the country, I see a lot of other folks like the same idea. I think it is a good one. Cultivate Limas until they start to vine.

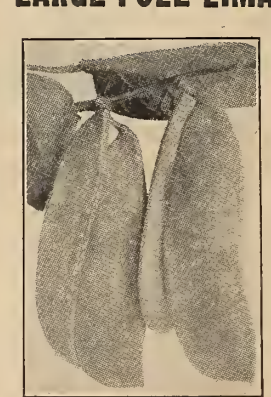

A few dwarf Baby Potato Limas are just about the nicest thing of it's kind I think. I like them a lot better than some of the others. It is a heavier yields and a bigger bean than the Hendersons. It is a sure yielder too.

Don't overlook the Hopi Indian Lima Pole Bean. When we first got that one from the Hopi country, it didn't know how to climb, but we have been working with it—selecting it very carefully. Now we have a real honest-to-goodness climbing strain and it's a dandy. Don't pass this one by.

I have saved the best one until the last, and I can't leave beans without saying a few words about the new Speckled Calico Pole Lima. You will find it in color on the front cover of the catalog. I have these in my Ozark garden. It does exceptionally well down there. It does just as well here in Iowa. I gave some to some of my friends for a special trial the last couple of years, and they all tell me the same thing. It's a sure cropper, a most vigorous grower and about the nicest thickest kind they have ever seen. Be sure to try some of those Calico Pole Limas this year.

CABBAGE

Cabbage is one of my favorite vegetables and I have always had a lot of it in the trial grounds. Used to raise a lot of it for market. I have spent a good deal of time in checking over the different varieties and kinds of seed. Guess I've tried all of four hundred kinds. These are the pick of them all. Start in house or hotbed six weeks or more before you expect to plant out of doors. Likes rich deep soil. An ounce should make 2,500 plants.

THIS IS THE FAMOUS HOLLOW CROWN PARSNIP

THE BEST IN MUSKMELONS

I'm proud of my muskmelon seed. I don't believe there is another seedsman in the country who has spent as much time fussing with the growers, inspecting crops and worrying about his melon seeds. Every variety is grown by a specialist in an isolated place where it doesn't get a chance to mix with anything else. Plant them after the ground is warm. Figure about three dozen hills for one packet of seed or 100 hills from an ounce. Give them plenty of room, at least 6 to 8 ft. each way.

OUT OF THE LETTER BASKET

Says My Garden Seed Best

"Dear Henry: I raised a really GOOD garden this year. I had fine tomatoes, canned all I needed, and I had ripe tomatoes in the garden until frost. Your garden seed is the best there is on the market. I had good watermelon. I want a catalog soon as possible so I can order my garden seed for spring."—Mrs. Annie Mason, Tupelo, Oklahoma.

Won 55 Prizes with My Seeds

"Dear Henry: From garden seeds I obtained from you I won at the Fair this past season, 28 FIRST PRIZES and 26 SECOND PRIZES besides taking the grand prize for having the most premiums won at the entire fair. I don't remember just how long I have been buying garden seeds from you but I do know before we moved from Linwood, Nebr., in March 1912."—Mrs. Louise E. Nichols, Loup City, Nebraska, Box 425.

This Garden Paid Well

"Dear Mr. Field: Had excellent results with your seeds this year. From a 10c packet carrot seed (New Coreless Chantenay) sold over \$3 worth, still have two bushel or more in basement, cook some for chickens and our kennel of dogs 2 or 3 times weekly, and gave away to friends all summer, fall and winter. "The No. 147 Improved Fillbasket Peas were the finest we ever had. Sold \$5 fresh peas. Nearest to Cal. and Colo. peas we ever had. After we had sold \$5 worth, the young ducks got into the patch or would have sold more."—J. R. Laird, Des Moines, Iowa.

Another Convert to Sugar Lumps

"Dear Mr. Field: My two grandchildren persuaded me to plant some melons as I never had any luck raising melons. I tried your sugar lump melon and to my surprise we had melons from July 12 up to frost. Never had so many melons before. It was very dry here last summer so from now on it will be sugar lump melons seed from Henry Field's."—Mrs. Rudolph Fenell, Rt. 2, Lincoln, Nebraska.

Found Field's Seeds Pay

"Dear Henry: I sure learned my lesson about buying cheap onion plants. About 6 years ago I bought some Bermuda onion plants at a bargain. Well, all I can say is if they were Bermudas, I am Prince of Wales.

Every since then I have bought my plants from Henry Field so I won't be disappointed.

"Hope you keep on publishing Seed Sense as it is so interesting. You seem like an old friend to me. Hoping you all the success in the world, I am."—A Henry Field Booster, Mrs. Septa Maag, Overland, Mo.

Every Seed Grew

"Dear Mr. Field: I sent for some of your tomato seeds, and I never had so many in my 24 years of garden raising. I think every seed grew. I canned 85 quarts tomatoes, 20 quarts juice and 20 quarts catsup, besides we had sliced tomatoes till it frosted and I kept the neighbors supplied. Our neighbors said they had never seen such a tomato patch. My mother's folks also got seeds of you because we all know we can depend on what you say. We will be sending our seed order before long."—Mr. and Mrs. Hubert Mann, Moorhead, Iowa.

Advise Folks to Buy of Me

"Dear Mr. Field: I have made a garden for many years, but last year I had more beans and peas than I've ever had. The Brown Crowder Peas was simply loaded and the Calico Lima tried to out-do the Crowder. The Spanish Onions were the finest I have ever seen grow in Kansas. I always advise folks to buy seed from you."—Mrs. Binder, Box 2, Elmo, Kansas.

Seeds Just as I Say

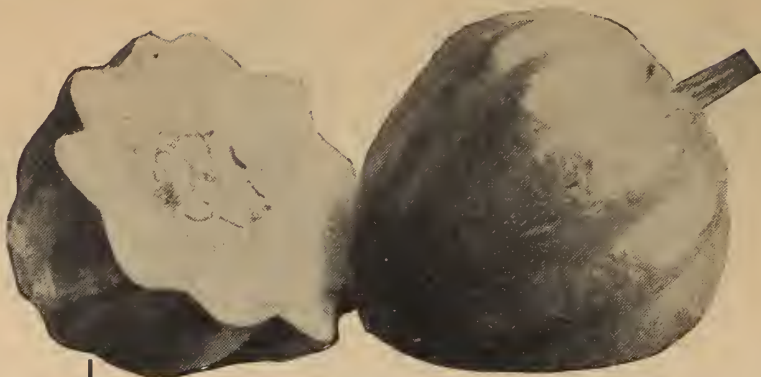

"Dear Mr. Field: I have ordered my seeds from you for years to find them just as good as you say. I am well pleased with them. I snore enjoy reading the Seed Sense. I get lots of good ideas out of it."—Mrs. Emma Eby, Mammoth, Iowa.

Field's Seeds Beat Them All

"Dear Mr. Field: I want to tell you about the praise I get on my garden that we raise from your seed. We had what they called a home tour of 11 families. We go to each home and see how much improvement each has done in the past year. We are proud to say there were not but 1 or 2 other gardens that were anywhere near like mine. They said if there were to be any prizes given for the best and nicest garden, mine would take first. O, boy, was I thrilled, for I had worked so hard and with good seed to have the best. I told them I always planted Henry Field's seeds for the best luck."—Mrs. Ray C. Carpenter, Chanute, Kansas.

SQUASH

Squash likes rich loose soil and plenty of room—at least 10 to 12 feet apart. Use plenty of seed. Bugs sometimes play havoc with the seedlings but you can get them with Bug Dust. 752 (80 days.) Sometimes called Acorn because of its shape. One of the most deliciously flavored squashes I know. If you like squash pie, use this variety. Just the right size to cut in half to serve two. About 6 inches long, shell is thin, hard, dark green. Flesh yellow and very tender. **Price: Pkt. 7c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.20, postpaid.**

WATERMELON HEADQUARTERS

I want every farm to have a big watermelon patch. Even the backyard gardener should raise a few hills of them. Nothing will make the boys happier than a good melon patch of their own. My melon seed

comes from fields grown especially for seed crops. Melons like warm loose soil. Give them plenty of room, at least 10 feet each way. Figure about 50 hills from an ounce of seed, or 3 pounds to the acre.

THE WILT RESISTANT KLECKLEY SWEET

This new strain is the earliest I've found yet. Some are ripe by June 30. All varieties ripe by July 10.

"ICE BOX" SIZE

All of the varieties are individual size, about 8 or 9 inches through. Fit in an ice-box without cutting. No slice left over to get tough.

SWEET CORN

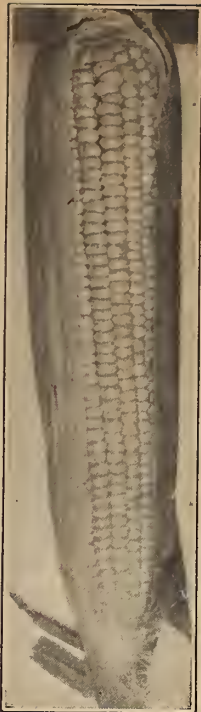

We used to think that Sweet Corn couldn't be planted until after all frost danger was past, but with some of the new vigorous hybrids, it's a different story. You can plant them most as quickly as you can get in the ground in the spring. Of course, no corn is really frost proof, but the new hybrids are more or less cold resistant, and can stand real early planting.

A half-pound of seed is enough for about 100 hills. You can generally figure 10 to 12 pounds of seed per acre. Plant at intervals of 10 days until the middle of July for new corn all summer.

You all know what an improvement hybrid field corn is over the open pollinated type. Well, hybrid Sweet Corn is just as much of an improvement in its class. That's why I am talking about hybrid Sweet Corn first—plant Hybrids and plant plenty of them.

Probably the most popular of all of our hybrid corn, is our Special Hybrid Sweet Corn Mixture or Blend. We think so much of it we put it on the front cover of the catalog. This blend is made up of all the fine varieties you will find listed in the catalog, and some others thrown in for good measure—brand new ones, we haven't listed as yet. Taking it all in all, this blend will give you roasting ears from 4th of July on until almost frost. So, if you don't have room in your garden for a few rows of each variety, plant some of this special mixture. You can have them all in one row. I don't know of a better or earlier type of Sweet Corn than the Early Giant Bantam Hybrid. Giant Bantam Hybrid is a mid-season crop and comes in a little later, and Golden Cross Bantam is a real late or main crop sort.

Of course, we have the old standbys—Golden Bantam, Country Gentlemen, Stowell's Evergreen—they are all good, and still deserving of a place in your garden.

↑ **STOWELL'S EVERGREEN**
The Giant White Corn

188 (96 days.) Don't try to make gardens without this one. Standard variety for both home and market gardener. Plant this one for canning and drying as well as for the roasting ear season. I always maintained it had more corn to the cob than any other variety. Stays in milk stage a long time. Triple size pkt. (3 oz.) 10c; ½ lb. 18c; 1 lb. 28c; 3 lbs. 75c, postpaid.

OTHER WHITE SWEET CORN!

181 **EARLY EVERGREEN.** (92 days.) Early evergreen type. An early addition to the regular Evergreen sort. Deep white grains. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 17c; 1 lb. 29c; 3 lbs. 75c, postpaid.

187 **TRUCKERS FAVORITE.** (85 days.) Southern Sweet Corn. This really isn't Sweet Corn but down south they can't grow Sweet Corn very well and this one will grow in spite of ear worms, drought, heat or most anything else. Ears are large—7 to 9 inches long, carrying 12 to 16 rows of kernels, stalk is very vigorous, usually 8 feet tall, matures about 104 days from planting to roasting ears. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 17c; 1 lb. 25c; 3 lbs. 65c, postpaid.

COUNTRY GENTLEMEN→ The Tender White

189 (93 days.) Sometimes called Shoe-Peg or Zig-zag because of irregular formation of kernels. Long slender grains with ears just the right size for eating on the cob. Very tender and sweet. Heavy producer. Fine for canning. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 17c; 1 lb. 29c; 3 lbs. 75c, postpaid.

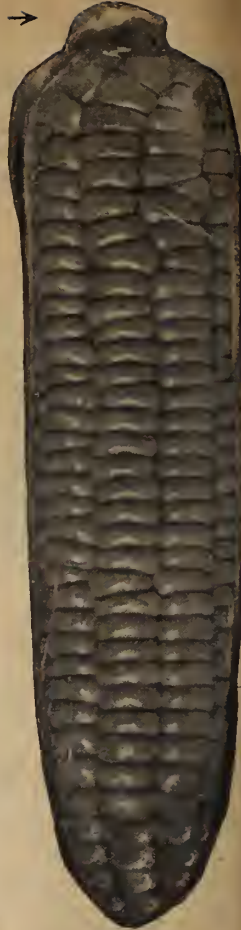

GOLDEN BANTAM → Favorite Yellow

177 (80 days.) I don't know of anyone who doesn't like to set his teeth in an ear of Golden Bantam. It is recognized as the standard yellow sweet corn. Grows 4½ to 5 feet tall, very productive, early, tender, sweet delicious flavor. Price: Triple size pkt. (3 oz.) 10c; ½ oz. 18c; 1 lb. 28c; 3 lbs. 69c, postpaid.

OTHER YELLOW SWEET CORN

174 **EARLY SUNSHINE.** (76 days.) Earliest of all. A full week earlier than Golden Bantam with a larger ear carrying 10 to 12 rows of creamy, yellow kernels. Fills well, is very tender and surprisingly large for such an early sort. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 19c; 1 lb. 28c; 3 lbs. 75c, postpaid.

179 **GOLDEN COUNTRY GENTLEMEN.** (92 days.) Shoe Peg—largest of all. The one I used to talk so much about last spring. A glorified golden Country Gentlemen. Sweetest and finest flavored corn grown. Has all the good points of Country Gentlemen and the fine flavor of Golden Bantam. Very prolific. Usually grows 3 ears to the stalk, averaging nine inches in length. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 20c; 1 lb. 30c; 3 lbs. 75c, postpaid.

THE BEST SEED OF TOMATOES and How to Grow Them

I've tried out a lot of different varieties of tomatoes and I've discarded all but the best of them. These varieties are the pick of the lot, over a period of the last 40 to 50 years. My seed stocks are extra select, pure, uniform, and they have to be right. Plant both early and main crop sorts, so you will have plenty.

PONDEROSA

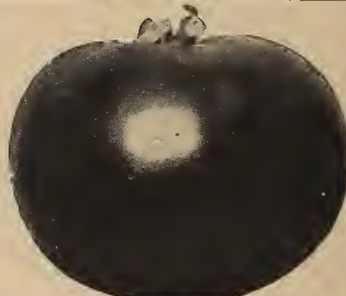

Largest of All Tomatoes

418 (86 days.) Here's one you can't beat. It is too tender and doesn't hold up well for market, but for home use there's nothing like it. PEAR TOMATO

The old fashioned pear shaped preserving tomato. Fruit is borne in clusters. No. 419 (75 days.) **YELLOW PEAR** No. 406 (90 days.) **RED PEAR** Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

FIELD'S RED BIRD

FIELD'S EARLY JUNE

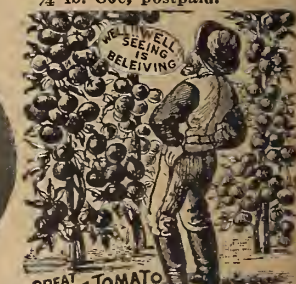

Good and Early

402 (66 days.) Another good extra early one. Not as large as some and doesn't yield as much as some but makes it up on earliness. Medium size, rounding, flat, dark red, fine for slicing. Price: Pkt. 5c; ½ oz. 18c; oz. 30c; ¼ lb. 90c, postpaid.

Sow some real early in the spring for mid-summer use, and later on some more to put down in the basement or cave for winter. Cover the seed ½ inch deep in rows 18 to 24 inches apart, thinning them out to 2 to 4 inches apart in the rows. One ounce of seed will sow 100 foot row.

Hybrid Sweet Corn Is

- SWEETER
- MORE TENDER
- HEAVIER YIELDS
- DISEASE RESISTANT
- LARGER

Everybody's planting HYBRID Sweet Corn now. It's more tender, earlier, sweeter, MUCH HEAVIER YIELDER and disease resistant.

Just like Hybrid field corn, the hybrid sweet corn more than pays in increased yields for the cost of the seed. And it TASTES so much better.

Plant some of all this year. These are the best of 60 hybrids checked in our trial grounds. H. F.

The New GRAPE TOMATO

425 (73 days.) Not a novelty—but a perfect-tasting, heavy bearing, vigorous tomato. Never saw a rotten one or a vine that wasn't loaded full. Absolutely hardy and will bear even if all other tomatoes fail. Especially good for canning, preserves and sauce, but there's nothing better for eating. Seed scarce. Price: Pkt. 19c; ½ oz. 29c, postpaid.

RUTGERS—Likes Drought

417 (110 days.) I found this one in New Jersey. After trying it out here for a couple of years, I am ready to believe that it deserves a place in every garden. SCARLET SLICER

442 (24 days.) Valuable as a standard home and market gardening sort for forcing. A quick grower, and attractive. Oblong, white tipped. Very early. Price: Pkt. 7c; oz. 15c; 1/4 lb. 24c; 1 lb. 88c, postpaid.

DETROIT DARK RED

Favorite the World Over

604 (58 days.) There are no white streaks or rings in this one. It is a deep, rich red color, inside and out. Globe shaped. Has small tap roots and is excellent for home or market garden. Stands handling well. Price: Pkt. 9c; oz. 24c; 1/4 lb. 70c, postpaid.

BOSTON CROSBY

The Earliest Deep Red

603 (50 days.) Here is the small early, dark red, globe-shaped beet that you have been waiting for. It is a distinctively new variety—much better than anything that we have had to date. The tops are small, flesh is very tender and it is unusually attractive. Price: Pkt. 7c; oz. 20c; 1/4 lb. 65c, postpaid.

STOCK BEETS

(90 to 120 days.) Makes 15 to 20 tons of beets to acre. Sow the seed in April and May in rows 2 1/2 to 3 feet apart, at the rate of 10 or 12 lbs. to the acre. Harvest before severe frost and store in pits or cellar. Livestock and poultry sure to go for stock beets. Price on all varieties: Oz. 20c; 1/4 lb. 65c; 1 lb. \$2.15; 5 lbs. \$9.00, postpaid.

Mam. Long Red

616 GIANT FEEDING SUGAR. One of the heaviest producers. Its extra sugar content makes it more desirable for a dairy feed. Fine keeper, oval shaped.

619 MAMMOTH LONG RED MANGEL. The largest and most productive of all. Called by some "Gate Post" because of its size. Often reaches 24 to 30 inches in length with individual weight from 25 to 35 lbs. Easily harvested as the root grows half out of the ground.

610 POULTRY BEETS. You who have fed mangels to poultry know their value as a winter feed to take the place of green stuff to keep the hens on production. This is a mixture of all kinds. Makes real feed.

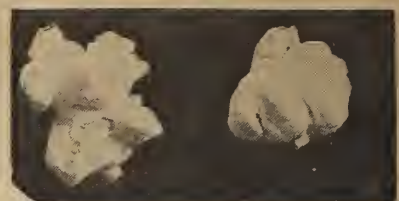

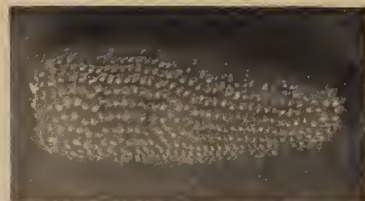

High Germinating BEET SEED

I have spent a lot of time to get you only the finest kinds of beets. On some of the varieties, I have even sent to Europe after the seed. I like a beet of uniform shape and color, with small top, small tap root, free from the straggly side roots. One ounce of seed will grow 100 foot of row. Plant as soon as you get in the ground in the spring and make several sowings throughout the season.

Make Money Growing POPCORN

NEW HYBRID JAP HULLESS

193 (100 days) Absolutely the last word in popcorn. Originated by Minnesota Experiment Station and has a 16% greater yield with a popping volume more than 29% over the ordinary kinds of Jap Hulless. That means a lot more eating and you just can't beat Jap Hulless for flavor and tenderness. Supply limited. Price: Pkt. 10c; 1/2 lb. 25c; 1 lb. 45c; 3 lbs. \$1.25, postpaid.

THE NEW SUPER GOLD

198 (110 days) I've grown popcorn since I was a boy. It's still one of my favorites. Every time I hear of some new, I get it. Super Gold was originated by the Kansas College. It has everything—volume—most thirty to one. Practically hullless. Color—a rich creamy white; yield—better than the best of them. Vigorous and drought resistant. Price: Pkt. 10c; 1/2 lb. 20c; 1 lb. 30c; 3 lbs. 75c, postpaid.

At Last! Genuine Baby Golden

191 BABY GOLDEN. (85 days.) At last I have succeeded in getting some of the genuine Baby Golden popcorn. It took me years to get a stock of it worked up. It's been quite a job but I have the real thing now. Baby Golden has a squirrel tooth kernel, the ears aren't much bigger than my big finger and it's the "poppingest" popcorn I ever had. No hulls whatever, sweet and tender. Price: Pkt. 10c; 1/2 lb. 20c; 1 lb. 35c; 3 lbs. 90c, postpaid.

GIANT POPCORN

197—(110 days) **SOUTH AMERICAN (ARGENTINE GIANT).** Here's the giant. Pops out in large, creamy-yellow grains. Large ears and smooth grain. Yields heavily. A vigorous grower. Price: Pkt. 9c; 1/2 lb. 20c; 1 lb. 30c; 3 lbs. 75c, postpaid.

JUMBO PEANUTS

218 Great big kind. Plant them the same time you plant beans. Not as early as the Early Northern but you are reasonably sure of a crop here in this section. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

EARLY NORTHERN PEANUTS

219 The early peanut for the Midwest. Small, well filled pods with lots of them on the vine. Will ripen anywhere in the corn belt as they are early and like our soil. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

NEW! DOUBLE JOINTED PEANUTS

215 Most kinds of peanuts grow by twos—that is there are two of them in a nut-shell. Well, I have found something, a variety which grows down in Tennessee with three or four nuts in every shell. So we have called them Double Jointed. They have prolific growers, do just fine, we had a lot of them here in the trial grounds this year and I wish everybody would plant them, especially the boys and girls. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

PEANUTS

How to Grow Peanuts

Yes, you can grow peanuts in this climate just as well as not. They don't yield quite as heavy as they do in the south, but they do yield enough to give you plenty to feast on all winter.

Plant just like beans, in soft loose soil, after it gets thoroughly warm in the spring. Thin to a foot apart in the row and keep well hoed.

TABLE TURNIPS

The Four Best Varieties

Plant some of the early ones in the spring, just as early as you can get in the ground. The main crop turnips are best sown the latter part of July.

Turnips will keep growing in the ground until it freezes and then may be stored in the cave, basement or crib. One ounce will drill 150 feet of row. 2 or 3 lbs. to the acre.

303 **EXTRA EARLY MILAN.** (40 days.) One of the earliest turnips in cultivation. Fine for home or market. The roots are flat, white with purple top, flesh pure white, very fine grained, sweet and tender. Price: Pkt. 5c; oz. 12c; 1/4 lb. 30c; 1 lb. 70c, postpaid.

307 **PURPLE TOP GLOBE.** (55 days.) The leading turnip, one of the best. Yields heavy crops of large, round, purple top turnips. Very tender, crisp and sweet. Flesh pure white, and it stores well for winter use. The flavor is unusually good. Price: Pkt. 5c; oz. 10c; 1/4 lb. 20c; 1 lb. 50c, postpaid.

310 **WHITE GLOBE.** (75 days.) A large late variety which is good for table use or for stock feed. It produces a tremendous turnip. The roots grow 4 to 6 inches in diameter, entirely white. Price: Pkt. 5c; oz. 10c; 1/4 lb. 20c; 1 lb. 50c, postpaid.

306 **PURPLE TOP STRAP LEAF.** (45 days.) Very similar to the Purple Top White Globe except that it is flatter in shape. One of the finest garden sorts for either spring or fall planting. Price: Pkt. 5c; oz. 10c; 1/4 lb. 20c; 1 lb. 50c, postpaid.

RUTABAGAS

Good Keepers

Firm Flesh

308 **RUTABAGA AMERICAN PURPLE TOP.** (90 days.) Has large, smooth, cabbage-like leaves. The root is large, globeshaped, with a small crown, yellow in color, with a purple top. The flesh is tender and crisp. Grown extensively in the northern sections. Crop was short. Not enough seed to go around. Order early. Price: Pkt. 5c; oz. 15c; 1/4 lb. 35c; 1 lb. \$1.00, postpaid.

SPINACH IT'S GOOD FOR YOU

GIANT THICK LEAF—Largest Leaf

207 A very heavy yielder with the largest leaf of any of the Spinach varieties. Somewhat crumpled, medium early. Crisp and tender. Price: Pkt. 9c; oz. 15c; 1/4 lb. 35c; 1 lb. \$1.00, postpaid.

RE-SELECTED BLOOMSDALE—Earliest

206 (40 days.) The earliest and finest variety of all. Medium size, leaves very crumpled and a rich dark green. Price: Pkt. 9c; oz. 15c; 1/4 lb. 35c; 1 lb. \$1.00, postpaid.

NEW ZEALAND—"The Drought-Resisting, Everbearing Kind"

210 (65 days.) The all summer kind. The more leaves you pick, the more come out. Makes a fine, heavy growth, and apparently enjoys hot dry weather. If you like greens, make a generous planting of this. Crop was a total failure. No seed to offer this year. Plant Swiss Chard. See Page 14.

BIG GREEN LEAF—Bears Longer

209 (48 days.) A second early which stands longer than the others before seeding. A very compact plant. Leaves medium large, and somewhat crumpled. Crisp and tender. Price: Pkt. 7c; oz. 15c; 1/4 lb. 35c; 1 lb. 95c, postpaid.

GROW YOUR OWN FRUIT

VALIANT FREESTONE

The Hardy Canadian Peach

Here's the peach that stood the Armistice Day freeze in places where all other peaches killed out. Originated by Canadian Horticultural Experiment Station so HAS to be hardy. Much like its parent—Elberta. Fruit large, yellow blushed red. Firm, juicy, excellent flavored. Ripens two weeks ahead of Elberta at time peaches bring a premium. Price: 10c per tree over regular varieties.

THE FAMOUS POLLY PEACH

The Peach That's Sure-to-Bear

Super hardy, sure-to-bear variety. Big freestone—white overlaid with rich red blush. Keen flavor and juicy. Introduced by Iowa State College. Produced a big crop of peaches every year. Fine for canning as it is very firm. Surest to bear. Stood 20 degrees below zero and bore a big crop. Now same price as other varieties. Ripens August 15th.

HARDY PEACHES

ABOUT PEACH TREES

I've watched peach trees and crops a good many years. Some varieties are pretty sure bearers and some aren't worth a rap. You can be sure I'm not offering you shy poor bearers. Listed on this page are the varieties I plant and believe in.

Plant 15 feet apart, or 190 trees to the acre. Plant peaches as fillers in your apple orchard.

All my trees are big, soon-to-bear, heavy rooted and I've priced them right. Dates given after varieties approximate ripening date. This may vary according to weather conditions.

ELBERTA

The Yellow Freestone Liked by Everyone

The most popular and no wonder. Big, rich, yellow, highly colored fruit. Heavy, sure bearer and fine flavored. The peach that everybody likes. It's the standard by which other peaches are judged. A good shipper. Ripens August 30th to September 15th.

CHAMPION

Hardy White Freestone

Very hardy in the central states. Has size and quality. A honey-sweet, rich, juicy white peach you'll rave about. Ripens around August 10th. White peaches are always hardiest.

HENRY'S HARDY HAWKEYE

One of the Hardest Peaches I Know

One of the hardest peaches I've ever seen. Has extra sweet flavor, ripens in August. Medium size and trees always loaded down.

This tree is the result of years' selection and propagation. My own introduction.

Formerly trees were scarce and we had to ask a premium. Now we have plenty of trees and will sell at same price of other peaches.

J. H. HALE

Extra-Large Freestone

Extra large, rich yellow, blushed red with smooth (not fuzzy) skin. Ripens a few days ahead of Elberta and tastes as good as any peach known. A money maker if you want to sell the fruit as it brings a premium.

HEATH CLING

for Pickling

White cling. Best to preserve or pickle whole. Late in ripening and keeps extra good. Ripens about September 25th. Flavor excellent.

GOLDEN JUBILEE

Red and Yellow Freestone

Beautiful new red and yellow with good size. Hardier than most and growing more popular each year. Flesh is yellow, tender, juicy and sweet. July 20th.

MAYFLOWER

Frost-Proof Semi-Cling

The earliest peach to ripen and really popular because it is the first fruit. Fruit medium size and a beauty with crimson colorings. Often called "Frost Proof" because it blooms late enough to miss the frost.

MIKADO

The New Early Peach

Yellow, red blushed freestone. One of the few outstanding new early peaches. Ripens first week in July. High quality in flavor and very attractive in rich coloring. Sure to bear in coldest weather. Early peaches always bring a premium on the market. Earliest. Order early.

FIELD'S GOLDEN SWEET

My New Yellow SWEET Cherry

Our own new golden yellow, sure bearing sweet cherry. Never fails to be loaded down with a big crop. Makes a beautiful shaped tree. Birds don't bother fruits on account of color. Plant one in your yard for shade, beauty and delicious eats and if you think you've ever tasted cherries, you'll change your mind after tasting this.

The Heavy Bearing MONTMORENCY

The standard by which all cherries are judged. Big, rich, red, fruit, always loads down the trees. Juicy but firm for pies or preserves. Good to eat right off the tree, and if you have any left over they will always bring a premium on the market. Montmorency cherries have been the favorite cherry since I can remember and I think they always will be. Make sure that any cherry planting you do includes Montmorency.

The New MONT-MORE CHERRY

Often BEARS 1st YEAR—Here's the best news in cherries we've heard for years. This was a sport from a Montmorency THAT WAS FOUND TO BEAR some fruit 1st YEAR after planting. At 3 to 4 years, it bore a full crop. Dwarf—Easy Picking—It's unusual in that it grows much lower than Montmorency—about 8 to 12 ft.—and still produces a full sized crop. Trees never get so tall, but what fruit can be picked from the ground. Big Crops 3 Years—Ideal commercial cherry. Gets in full bearing within 3 or 4 years. Fruit is often larger than Montmorency and quality as good or better. Will bear anywhere from Georgia as far north as cherries will grow. PRICES—All Postpaid.

THE WORLD'S MOST BEAUTIFUL HYBRID-TEA EVERBLOOMING

GIANT 2 YEAR PLANTS—ALL WILL BLOOM

HOW TO PLANT ROSES

Set in good garden soil, 18 inches apart. Set fairly deep (about 2 inches below dirt line on plant) prune back to 5 inches—cover the top with earth until they get a chance to start swelling buds, then carefully remove dirt and they're ready to go. (Hybrid Teas are monthly blooming roses.)

RED RADIANCE

The Hardest Red—Free Bloomer

The "fool proof" red rose. Noted for hardiness, and free blooming qualities. Flowers large red, full double. Will grow and produce hundreds of blooms in poor soil, with little care. Never seems to rest, but blooms constantly from spring to frost. Radiance roses bloom best of all varieties the first year they're planted, so if you want plenty of bouquets this year plant Radiance.

PINK RADIANCE

The Drought Resistant Pink

Best to bloom, best to resist heat, drought and disease of all the pink roses. Flowers big, full, brilliant rose-pink. Loaded down with blooms all summer long. A new radiance color. Soft salmon pink, somewhat lighter than Pink Radiance. Has all the radiance quality, hardy, free blooming, disease resistant.

WHITE RADIANCE

The Hardest White

Clear purest white—long pointed buds and big full flowers. Very free blooming and hardy.

AMI QUINARD

The Largest Red Rose Grown

My largest flowering red rose. Immense rich velvety, very dark red, long lasting flowers that hold their color till petals fall. A fragrance as rich as the dark red color makes this a rose everyone should have. Very hardy.

BETTY UPRICHARD

The Fragrant Pink

Extra hardy. Upper side of petals light pink. Reverse dark pink with orange tint. Buds perfect and blooms no matter how hot. I believe this will always be one of the most popular roses I sell.

BRIARCLIFF

The Long Stemmed Pink

Big pink flowers edged with cerise. A greenhouse favorite because it lasts so long. Stems long and stiff so you'll want this rose for cut flowers for gorgeous bouquets & centerpieces.

CALEDONIA

Always Stays Pure White

A large, double white, full high centered and a vigorous healthy variety. Stays pure white till the last petals drop. Doesn't blast like so many whites. If you can only have one white in your garden, make it Caledonia.

E. G. HILL

The Disease-Free Fragrant Red

Big full deep crimson flowers that actually grow deeper in color as the petals open. Holds its shape and color days and days in the garden or when cut. Most fragrant of all my red roses. Disease free, free blooming, super hardy. One of the most all-around roses.

EDEL

Best White for Cutting

A very fragrant big double white flower with ivory shading at the base. Buds long and pointed, with extremely long sturdy stems. A choice white for cutting. Loved by all.

ETOILE DE HOLLAND

Ideal Red for Cutting

Fiery crimson, long pointed buds, which open to full petaled flowers of striking brilliance, will make this variety the high spot of color in your rose bed. Stems long and stiff, and a delightful fragrance make this an ideal rose for cutting. Everyone loves this rose.

EDITOR McFARLAND

Always Has Most Blooms

A new and better big double glowing-pink rose. The compact bushes are loaded with blooms the whole summer through. Of hundreds of new roses I've tried, this was the most outstanding pink and it is making a famous name among garden club experts who pronounce it the perfect pink.

EDITH NELLIE PERKINS

Easy Grown—2-Color Rose

Flowers big and full—outside orange, inside salmon flushed with pure gold. Buds long and pointed. A strong healthy grower and like all two-toned roses, it will be one of the most admired roses in your garden.

K. A. VICTORIA

This White Blooms Continually

This is the favorite and the best white rose for the middle west. Buds and flowers glistening, snowy white. Foliage exceptionally shiny and clean. Superhardy and seems to bloom and bloom much longer than other hybrid teas. Exceptionally satisfactory.

HENRIETTA

My Yellow That Doesn't Fade

Sold only by Henry Field. Introduced because I wanted a perfect yellow rose for you. Pure yellow that doesn't fade, buds long and pointed, stems long and stiff, hardy, always in bloom and sturdy growing. Named for my granddaughter, Henrietta, whom I picture so much in Seed Sense.

GRUSS AN TEPLITZ

More Blooms Than Any Other Rose

The hardest and most free blooming of all roses. Good glossy foliage. Blooms entirely cover the plant from one side to the other. Flowers no extra large but there are so many of them every day that this rose will live up to you rose hed more than any other. Fine where other roses have trouble growing at schools, cemeteries and filling stations, and other difficult places.

LOS ANGELES

The Pink and Gold Rose

Flame pink, with tones coral and gold. A striking vivid rose that you will rave about. I had some of these in our trial grounds last year and think this color was talked about more than any. Often sold at 69c to \$2.00.

LADY MARGARET STEWART

Drought-Resistant Two-Tone

Brilliant orange turning to burnished gold as it ages. Hot weather won't hurt it and it seems to be able to keep its shimmering color despite hot sun. Plant lots of these for cut flowers.

LADY HILLINGTON

The Apricot Yellow

A beautiful apricot yellow. Very free blooming. Buds long and pointed. Very hardy and easy to grow. If you want a different and exquisitely beautiful shade in roses, plant Lady Hillington.

MARGARET MCGREDY

The Free-Blooming Red

A vivid scarlet with a touch of orange. Buds perfect for cutting with extra long stems. Compact growing bush with clean shiny foliage. Sure to bloom freely and heavily even if given only the minimum of care.

SOUVENIR DE CLAUDIUS PERNET

The Long-Bud Yellow

Long pointed buds of sunflower yellow. Many people like this best of all the yellow roses for cutting. I don't think any garden in the middle west should be without it, if they want a real "show-off" rose.

TALISMAN

The Famous Easy-to-Grow Greenhouse Style Rose

Think of gold, rich, scarlet, yellow and orange, all blended in one flower. Buds are like greenhouse roses and stems so long. No rose garden is complete without this rose. Be sure and include one Talisman in your order this year.

FIELD'S FAMOUS SHRUBS

TO BEAUTIFY YOUR HOME HOW TO PLANT SHRUBS

No need to say much. Every nursery order I send out has complete instructions easy to follow. Mostly, low growers are set 2 ft. apart, medium growers 3 ft. apart, and tall growers 4 ft. apart. Set out 18 inches from foundation.

Spread roots out well, tamp earth back solidly, and prune as indicated to make bushy growth.

Why Field's Shrubs Are Better

Got tired of telling you shrubs are 12" to 18" high or 18" to 24". You don't care about that. Good roots and branches are what you care about. You don't care a rap for a big, spindly shrub with poor roots. So here's how I grade plants.

SELECT PLANTS. Big, healthy roots with lots of branches like I've always furnished.

EXTRA SELECT. Cream of the crop with extra big roots from good growing condition and lots of branches.

THIRD GRADE. Thrown away. Not fit to mail. (DON'T BUY this grade somewhere else. Not fit.)

All Shrubs Inspected

All my shrubs are carefully inspected, once when dug and again before they are shipped on your order. Absolute quality is insured. All bad shrubs are destroyed. All are carefully wrapped and packed in special moss to arrive in the best possible condition.

All My Shrubs Are Hardy

These are the world's finest, hardy shrubs. All are selected because they give color and beauty with the least effort in any kind of condition. Easy to grow. No special care needed.

MY CHINESE ELM WINDBREAK SPECIAL

30 Big 2 1/2-Foot Trees 98c—FREE: 1 Hansen's Bush Cherry

That's Alfalfa John out at our No. 10 farm looking over our Chinese Elms growing there. Those were 6" seedlings when set out and the same season went way over 6 ft. That kind of growing makes QUICK, TIGHT WINDBREAKS. The special windbreak offer above is postpaid and will give you the same quick growth.

SEEDLING TREES FOR WINDBREAK

HOW TO PLANT WINDBREAK

Plant, if possible, 100 to 150 feet away from the house for best results. Plow a deep furrow where trees are to go and tamp seedlings in furrow carefully. Haul some water to the trees, if you can. Trees should be 6 to 8 feet apart in rows 8 to 10 feet apart for best results. Plant in staggered (zig-zag) fashion for best protection. The important thing is to PLANT EARLY. They'll do much better for you if you do.

USES OF EACH VARIETY

CHINESE ELM—For quick windbreak clear to the ground, drought resistant.
BLACK LOCUST—Best to prevent soil washing. Used by the Government.
OSAGE ORANGE—For windbreak and fence posts.
MULBERRY—Grows fast. Good fruits.

It would be ideal to plant in a shrubby border for height, or makes a most beautiful specimen on the lawn. If you want something the neighbors will rave about, order this new Flowering Peach. It shows the Edmunds are proud of their home and give it a lot of good loving care.

HOW TO MAKE AND PLANT A POOL

There are many types of pools used. Barrels sawed in half and sunk into the ground are used as tub gardens. Metal stock tanks of various sizes make ideal pools. The most common and less expensive of all materials used is the common building cement. Mix 4 parts of the sand to 1 part of cement. Can be shaped into any design you might wish to make. Dig hole in the ground shape you wish and slope the sides in at the bottom. This enables you to plaster the cement on the sides without making a form to hold it. Let the first thickness harden a few hours then apply another and another until you have it the desired thickness. Then pour some cement into the bottom and smooth it making sure to have one point low for the drain.

Don't fail to make a drain to your pool. A pipe or tile at least 2 inches in diameter should be used. The drain saves work and time. The best depth for the pool is 25 inches when finished. This depth allows about 12 inches for bucket and 12 inches above for the water plants which is very essential. Make sure the pool sides are built at least three inches above the top of the ground to prevent surface water from running in during a rain.

After the pool is completed, cover it over with wet burlap sacks and let the cement harden for 3 days, then fill it with water and put in 10 lbs. of rock salt to each 100 gallons of water and let set for 10 days, then drain and refill with water, using 5 lbs. of rock salt to each 100 gallons of water, let stand for 5 more days and drain. Then rinse out thoroughly and refill with water ready for the fish.

Aquarium Prices

Enduring and beautiful aquarium. The glass is the finest quality of crystal clear and does not magnify or change the appearance of the objects inside the water. This is a very important feature to bear in mind when choosing your aquarium. Cheap quality glass will give the water a milky appearance, spoiling the entire effect of a perfectly balanced planting. Colors: French Green or Black

How To Plant The Aquarium

(Balanced—Unnecessary to Change the Water)

First make sure the size of your aquarium, then find a collection (below on this page) for your size. Make sure you have the amount the collection calls for, of plants, snails, clams and hi-balls.

SAND... Place two inches of clean, common lumberyard sand, medium coarse, not too fine, in the aquarium and mound it up so the back will be some higher than the front, then fill with water. **PLANTING**... Put the plants in the sand as in above picture, make any arrangement you wish, scatter them

much as possible. Put in all the plants, snails, clams, hi-balls and one small fish. Let these grow for a week and then put in the rest of the fish. **FISH**... A good rule is to use 2 inches of fish body to each gallon of water. **LOCATION**... Place the aquarium so it will have good bright daylight but very little sunshine. **CLEANING**... Occasionally, use a small, extra clean cloth and wipe the glass on the inside, if a surplus of sediment accumulates on the bottom of the aquarium, dip it out with an aquarium dip tube or syphon it out with small rubber hose.

FOR REAL PROFIT BUY ONLY FIELD'S BETTER BRED CHICKS

Better Breeding—Careful Culling and Blood Testing Make Field Chicks More Profitable!

The superiority of Henry Field's chicks doesn't just happen. They came from careful planned expensive breeding. All of our chicks are regularly inspected by our own inspectors under the direction of Judge Leon Smith. All birds are carefully culled, wormed and mated and any birds that have failed to measure up to our higher standard are taken from our breeding flock. This careful breeding means healthier, more vigorous, and more profitable chicks for you.

**Henry Field's
WHITE GIANTS**

White Giants deserve the name because they are extra-large and grow very rapidly.

The Henry Field White Giant makes an excellent cockerel for caponizing, often weighing twelve pounds and more. Good capons bring top prices, that are much above regular market figures.

The pullets are good layers and their extra-size makes them desirable in every way.

**WHITE WYANDOTTES
Early to Market**

Henry Field's deep breasted White Wyandottes are the first to go to market. They make exceptionally good broilers and will reach some 2 to 3 lbs. quicker than almost any other variety. They are exceptionally good rustlers and many of our farm friends say that they almost make their living on any farm finding their waste feed around the farm. They are the all-purpose bird and you will find that they are very husky, hardy, and easy to raise and mature very rapidly.

**FIELD'S NEW HAMPSHIRE
"Leghorn of the Heavy
Breeds"**

Henry Field's New Hampshire can almost be called the Leghorn of the heavy breed for they are very heavy egg producers and combined with their heavy weight, they are hard to beat. They are noted for fast maturing, rapid feathering and have the vigor and hardiness of the White Leghorn and they have replaced the Leghorn on many farms, due to the size and rapid growth. Remember, large brown eggs almost bring top market prices.

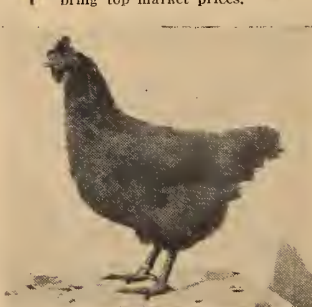

**GIANT BUFF ORPINGTONS
Good Winter Layers**

Henry Field's Giant Buff Orpingtons are exceptionally good winter layers due to their massive bodies and heavy plumage. These winter eggs come when the market is usually the highest. Our Buff Orpingtons are one of our heaviest varieties of chickens and have a beautiful golden color. They make exceptionally good heavy capons or heavy roasters. If you are interested in winter eggs or heavy meat birds be sure to order Field's Giant Buff Orpingtons today.

**SINGLE COMB
RHODE ISLAND REDS
Vigorous Egg Producers**

Henry Field's deep dark red Rhode Island Reds are favorites on many farms. They are very strong and rugged, beautiful color and are next to Leghorns in egg production. By careful mating and culling I have developed my Reds so they are fast maturing, and quick feathering and will be ready for the early markets. Many males used in my Rhode Island Red flocks are from up to 300 egg blood. Lay large brown eggs.

BLACK GIANTS

The Black Giants have been very prominent on many farms for several years because they grow extra-large and extra-fast. You'll find that they are easy to raise and make exceptionally fine heavy capons and heavy roasters. Heavy capons bring top prices — especially Black Giants, which dress out to a beautiful golden skin. Very attractive for table use.

**Plymouth Rocks—The Dual-Purpose Breeds
WHITE PLYMOUTH ROCKS**

Henry Field's Giant Type White Plymouth Rocks have a beautiful snow-white plumage and very fast maturing and rapid feathering, and will dress out at almost any age, yellow-colored, free from pin feathers, which makes them exceptionally fine for broiler purposes. The White Rocks are one of the most popular all-purpose breeds due to their meat qualities, and their egg laying ability. They lay large brown eggs which bring top market prices. We have increased their production ability by careful culling and mating with pedigreed males.

BARRED PLYMOUTH ROCKS

Henry Field's Barred Plymouth Rocks have proven their money making ability on many farms. They are large in size, fast maturing, rapid feathering and make exceptional fine broilers or heavy roasters and are also good producers of large brown eggs. They are one of the oldest of the All Purpose breeds and have proved very profitable on many farms.

Field's High Producing Egg Blood Means More Profits for You

Field's high producing egg blood means more profits for you. 200 egg hen means six times the profit of the average hen. That's why Henry Field chicks with the high producing blood directly into them for generations are bound to be money makers and larger egg producers. It costs as much to raise a scrub chick as it does a good producer. Buy the best and save money.

JUDGE LEON SMITH (Official A.P.A. Judge) CHARGE OF ALL FIELD'S FLOCKS

In an effort to offer Henry Field chick customers the best possible chick breeding, we have obtained the services of Judge Leon Smith—official judge of the American Poultry Association.

He devotes his entire time EXCLUSIVELY TO FIELD FLOCKS—supervising the culling, grading and blood-testing of all Field's breeding flocks—even the eggs in incubation—to make sure Field's chicks remain the highest quality possible.

Very few men are able to pass the rigid examinations to become an A.P.A. Judge, but once they have passed it, they are considered the highest poultry authorities in the country. All this means—a better chick for less money for you at Henry Field's.

Many Field Chicks Are Show Winners

All of this group of ribbons have been won by Henry Field's breeding stock. Out of 21 entries at the Nebraska State fair, we came back with 22 ribbons and three champion birds of the show. And the best display in the American class. We also were winners at the Missouri State Fair, and also at the American Royal National Poultry Show at Kansas City, Missouri. All of these fine quality breeders are used in our matings to improve our baby chicks.

Field's Offer You Choice of This Lot

- HYBRIDS, PULLETS
- EXHIBITION WINNERS
- ALL PURPOSE VARIETIES
- MEAT PRODUCING VARIETIES
- HIGH EGG PRODUCING VARIETIES

This is the year for you poultry raisers to make money. Uncle Sam says "RAISE MORE EGGS AND MEAT," and he's willing to pay well for them. He has pegged the market to encourage heavy production and it's up to you to supply the need—at the same time cashing in on big profits this year.

Remember, you help the Defense Program most by not wasting your feed on scrubby chicks. Stick to known quality—stock that has high egg-producing and meat producing blood bred into it for years. And there's where Henry Field can help you. For over 30 years we've bred poultry. Flock owners all over the country get better gains faster with Field's chicks. Don't be satisfied with less—this year of all years. Field's cost no more.

This Is an "ALL-OUT" EGG YEAR. . . The Government Wants More Eggs . . . Eggs Are Bringing Good Prices. . .

Field's Famous LARGE-TYPE WHITE LEGHORNS—Bred for Eggs

Leghorns Are Profitable

For many years the White Leghorns have been recognized as the heaviest producers of white eggs. They require less feed and less room per bird than almost any other breed. Field's Leghorns are noted for being the large type (not beefy) full of vigor and are great rustlers. They come from the finest breeding flocks in this part of the country and have been rigidly culled under the supervision of Judge Leon Smith, official judge of the American Poultry Association, to insure you the kind of Leghorns that will make you the most money.

BUY Leghorns with Care

Some folks think ALL Leghorns are heavy egg-layers. That's not true. I think 100 eggs per year is nearer the average for ordinary leghorns.

That's why it's important you get Henry Field Bred-To-Lay Leghorns. Even if they cost you 5c more per chick (which they don't) they pay that back many times over in EXTRA EGGS.

If you are short of room in your brooder house, remember you can have more pullets this fall by buying pullet chicks from me, and remember we guarantee 95% true to sex.

Cockerels Ready in 8 to 10 Weeks

And don't forget, Leghorn Cockerels usually cost you less but make fine broilers, reaching 1 to 1½ pounds by 8 to 10 weeks. Price poultry is, they'll make you good money, too.

These Two HYBRID EGG-PRODUCERS. Hybrids Lay More, Do Better

HYBRIDS

- Lay Larger Eggs Than Purebreds

LEG ROCK HYBRID The Hybrid Egg Cross

By mating some of my outstanding White Leghorn males with some of my fine White Rock females I am producing the Leg Rock Hybrids. Combining all the good points of these two great breeds gives you a bird that has all the size of the White Rocks and the egg laying ability of the White Leghorns. They are faster maturing and when mature the hens resemble the White Leghorns and the males the White Rocks. Easy to raise for they are more rugged and disease resisting than some other breeds.

LEGHORN MINORCA CROSS Sometimes Called Legorca

The Leghorn Minorca cross is the most popular for people wanting an abundance of large white eggs. This cross gives you a white chicken larger than the White Leghorns, with plenty of health, and vigor to mature faster and to get into production quicker. The laying flock can be kept on less feed than some other varieties, and your laying flock mortality will be much less in most cases.

Flock Owners Say Field's Chicks Grow Faster... Lay Better!

Saved \$4 and 100% Pleased

"Dear Henry: The 100 chicks you sent me April 14, arrived here in Seattle in 100% perfect health—not one sickly or dead in whole bunch. They started right in eating and drinking right away. We do not get chicks a bit better right here and we pay 12c each here instead of less than 8c each from you. We are greatly pleased and will count on you for chicks next year, too."—Chas. Edred, Seattle, Washington.

Pullets Laying in 4½ Mo.

"Dear Mr. Field: Just a line to thank you for the nice White Rock chicks you sent us. We sold 216 roosters when they were 4 and 5 months old and some were over 6 pounds in weight. The pullets were laying at 4½ months, which we think was real good. It was the nicest bunch we have seen."—Mrs. Ralph Peer, Dumont, Iowa.

Chicks Arrived O. K.

"Dear Folks: We received our 300 chickens May 29, and are very well satisfied with them. They are a perfect bunch of chicks and not a dead or droopy one among them. Thanks so much for your prompt delivery."—John W. Noonan, Wolbach, Nebr.

Chicks More Than Pleased

"Dear Seed Sense Folks: My baby chicks arrived all O.K. and alive. I don't believe I ever saw such a nice healthy bunch of chickens! They are all with their adopted mothers and enjoying their breakfast. Thanks again for the nice chicks."—Mrs. C. L. Bressie, Thayer, Ia.

Likes Our Chicks—Laying 70%

"Dear Folks: I want to tell you about the White Rocks, special quality pullets, purchased from you last fall. They are doing well and at 6 months are laying 70%. We certainly are pleased with all chicks received from your hatchery."—Mrs. Reynolds, Garnett, Kans.

Gets All Her Chicks From Field's

"Here's a picture of part of the chicks I got of you this spring. I received 100 White Rocks and 139 your choice and at 4 months had 214 left which I thought was a wonderful flock. One of my W. Rock cockerels weighed 5½ lbs. at 4 months and I have been selling them at 25c above market price for live birds. Of course, I GET MY FINE CHICKS FROM H.F."—Mrs. A. E. Knutson, Montfort, Wis.

Here's a real Alfalfa for folks who want choice
plump seed of good color but still want it cheap.
Contains plump, high-germinating seed but we
can sell it for less because we bought it at a bar-
gain. Purity 97.5% or better pure.

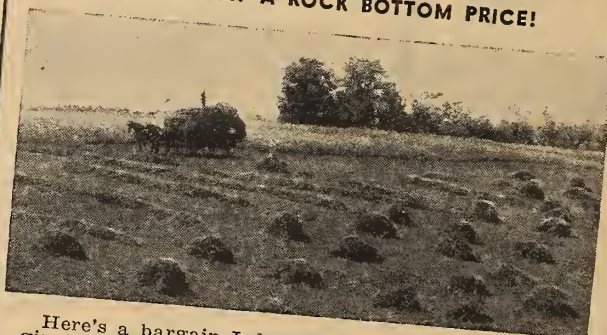

Blends of Best Alfalfas Will Fit All Soil Types

This mixture is a blend of the hardest
spreading root type alfalfas and the tall grow-
ing, heavy producing types. Being a blend,
it will fit almost all soil types and give a
stand almost anywhere. Combines hardiness
and heavy production like no single alfalfa
can give.

Always Popular

This blend is always one of my most
popular alfalfas. Please order early. Sow
same as any alfalfa—12 to 15 lbs. per A.
Meets all AAA requirements.

gin to tie anywhere. It's a lot just made for you
folks who want Alfalfa at Red Clover prices.

expensive Alfalfas, but it will give you a hay crop
that's the best you ever saw and that's what you
want anyway.

Free of Noxious Weeds

pan or clay subsoil territories. Somewhat leafier and higher in
feeding value than any other alfalfa.

A REAL BARGAIN—96 1/2% PURE

You won't be able to touch Grimm alfalfa at this

YOU ALWAYS SAVE BUYING DIRECT FROM HENRY FIELD

You never saw Henry Field when his field
seed prices weren't a bargain. And you
never saw him short change anybody in
quality of seed. The reason is buying direct
from him, you cut out a \$1 or \$2 or \$3 or
more dealer commission and you get that
savings for yourself.

Besides that, by buying in such tremen-
dous quantities, I am always able to buy
better seed, and buy it at a better price than
a small dealer who may sell only
1/100th as much. And that isn't even men-
tioning the many thousands of dollars
worth of equipment we have to clean this
seed up fine as the
best anywhere,
which most small
seedsmen can't do.
So always remember

trained seed analysts, cleaned to remove any

your protection. Buy seed where you get

I have a lot of fun writing "Seed Sense." I try to put all of the pictures and information about planting, pruning, seeding, etc., that I think will interest you. It's crammed full of information and fun, and is printed three or four times a year. If you want it, say so.—H. F.

**HELP YOUR COUNTRY
CONSERVE COTTON!
WE WILL PAY YOU
15c TO 25c EA.
For Returned Field Seed Bags
or Corn Bags
HERE'S THE DEAL**

Our country needs every cotton factory to produce army goods. That means you and I must use cotton goods over and over again, wherever we can.

That's why I've worked up this deal to pay YOU for returning bags for re-use. Instead of buying new ones, we buy them from you, making you a nice profit and saving cotton facilities. We make nothing from this deal, except the knowledge we are doing our part.

We will pay you 15c for each satisfactory bag you return or 25c for it, if the credit card we issue is used in buying an order of hybrid corn.

Only bushel and seamless Field seed or corn bags IN GOOD CONDITION without holes and dirt and with Henry Field brands on them will be accepted. Simply tie them up in a bundle, tag them to Henry Field, Shenandoah and mail them. Unsatisfactory bags will not be paid for or returned.

Let's do our part by using bags over. You'll make a nice profit doing it! Save up three or 4 and send them at one time.—H. F.

PASTURE, SOIL-BUILDING AT LOW COST!

This mixture of white and yellow sweet clover saves you money, but yet is better for pastures because the yellow blossom hardens up earlier and makes earlier pasture and the white blossom part lasts longer in the fall, and is ideal for soil improvement. Seed is cheap but meets all AAA requirements. Seeding goes a long way and pasture is finer stem and more tender than straight White Blossom. All hulled and scarified seed. Full 60 lb. bu.

BUYING MIXTURE SAVES

By buying the two seeds mixed you get good quality but it costs you less. Last year thousands of people sowed this mixture and made the saving this combination gives.

"GOOD BUT CHEAP" PASTURE MIX PERMANENT—FOR HAY & PASTURE

Grows Everywhere. Gives All Season Pasture

This mixture grows on every type of soil, giving pasture all season long. Makes an excellent hay meadow, too. The soundest seeding that you can make is a balanced mixture. Only 1,000 bushels of this seed available at our low opening price of only \$4.50 per bushel. Sows 3½ acres per bushel.

My Most Popular Hay and Pasture Mixture
Lot 50-50 is always my most popular mixture. It gives splendid results throughout the year to those farmers who want to seed a good, sound, balanced combination of grasses and legumes and expect to give it rough treatment because of its large number of clovers and grasses (6 clovers and 6 grasses) it gives pasture on all soils all season long. There is always grass coming along to give green pasture even in the heat of the summer.

6 Clovers and 6 Grasses

To insure a good stand everywhere I include 6 CLOVERS (Red Clover, Alsike, Sweet Clover, Korean, White Dutch, and Alfalfa) and 6 GRASSES (Kentucky Blue Grass, Rye Grass, Reed Canary, English Blue, Red Top, and Timothy). Special price only \$5.75 per bushel of 45 lbs. or \$12.80 per 100 lbs.

If your land doesn't grow Sweet Clover to advantage we can supply Lot 50-50 without Sweet Clover at only \$5.95 per bushel or \$13.20 per 100 lbs. Sow a bushel on 3½ to 4 acres.

60 Lb.
\$11.00 Per 100 Lbs.

Hulled and scarified Korean has really made friends with farmers. It germinates and grows quicker than unhulled. It takes less seed per acre—only 10 to 12 lbs. where 20 to 25 lbs. of unhulled Korean is needed. It is absolutely free of the noxious weeds which are hard to clean from unhulled seed. We were one of the first in the country to offer hulled Korean and have built up a beautiful stock of seed 99% pure. Order early. Not enough to go around.

NEW CROP SUDAN \$3.25 Per 100 lbs.

All High Quality—New Crop Seed
This is beautiful seed—98% to 99% pure Sudan, absolutely noxious weed free. Heaviest, plumpest, selected Sudan available. Johnson grass and noxious weed free, of course. Sow Sudan for Midsummer Feed
Sudan is the answer for summer pasture. Feeds on thousands of livestock farms. Enormous yields. Besides carrying more head of livestock per acre than any crop that I know of, Sudan yields 4 to 10 tons of hay per acre, well, 25 to 30 lbs. per acre. Every farm needs a patch. Sow after corn planting time. Drill in close rows or broadcast using about 25 to 30 lbs. per acre. Cover not over 1 inch in depth and pack the seed bed.

Certified Sudan No. 23 Now \$6.95 Per 100 Lbs.
Leafier—Heavier Yielding—Free of Hybrids
Sudan No. 23 is the new, absolutely pure, certified Sudan. The tallest, most leafy, heavier growing, and true to type plants have been selected to make this strain. It actually yields from 25 to 40% more tonnage per acre than ordinary Sudan. FREE from all cane hybrids making a Sudan that you can pasture without danger to your livestock no matter what kind of weather we have. Put up only in 100 lb. bags at the special low price of \$6.95 per hundred pounds.

BROME GRASS "The Miracle Drought Resister" **\$18.95** Per 100 Best No. 1 Ex. Heavy

THESE PRICES CAN'T LAST LONG
Brome Grass is a very short crop this year and the demand is extra heavy. We'll see big advances within 30 to 40 days—which means, buy your BROME early. Be sure you get clean seed—much Brome sold, unless bought at a reliable seed house, contains from 10% to 40% of cheat—a very undesirable weed. Ours is cheat free!

THE MIRACULOUS DROUGHT RESISTING GRASS

Here's the ideal drought resisting grass. roots go down deep into the ground for moisture, so it can stand the severest kind of hot weather. It is green when other grasses go dormant. Starts two weeks ahead of other grasses and lasts two weeks later in the fall. Winter hardy. Doesn't kill out. Cattle like it. Hogs like it. Ideal in combination with alfalfa or sweet clover.

HOW TO SOW

Sow early on a good seed bed. Harrow or roll in well. Rolling is best. If sowing with alfalfa use 10 lbs. Alfalfa and 6 to 8 lbs. of Brome. Sowing with sweet clover use 10 to 12 lbs. of Brome and 6 lbs. of sweet clover or sow alone 15 lbs. per acre.

(Both Brome & Brome Mix Are Eligible to \$1.50 per Acre AAA Payment)

BROME GRASS MIX FOR DRY LANDS Ideal Mixture for Dry Land—Kans., S. Dak., Nebr. **\$7.20** Bu. Sows 3½ A.

This mixture is made especially for the sections that don't get sufficient moisture. Grows heavy hay and pasture, despite the driest conditions. Winter hardy—cattle, sheep and hogs like it—grows anywhere and gives all season and permanent pasture.

OVER 50% BROME—CHEAPER THAN BROME

Contains over 50% Brome Grass with other hardy native dry land grasses such as Blue Stem, Grama, Crested Wheat Grass and Slender Wheat Grass and others that do so well in the drier sections of the United States. All livestock like it. It's good the year round as it makes a firm sod good for winter pasture.

HOW TO SOW

Sow 12 to 15 lbs. per acre early. Roll in well on a firm seed bed. Add 5 lbs. of alfalfa to the acre if you wish. It will increase the protein content and you can then pasture alfalfa with no fear of bloat.

The New Way to Plant Corn Weather-Proof Mule-Hybrid Blend

This new weather-proof blend of ours is amazing farmers the country over, but it's just plain common sense. Ordinary corn throws its pollen over a period of only 3 or 4 days. If a hot wind hits it during that time, it's pretty hard on the corn.

This blend ends that. Being a careful mechanical blend of adapted varieties in scientific combination, IT THROWS ITS POLLEN OVER A PERIOD OF FROM 20 to 25 DAYS, thereby furnishing pollen enough to fertilize and set all the corn despite hot winds which might kill the pollen for a part of the time.

Throws pollen over long period. Actual tests prove it yields 6 to 8 bu. more per acre.

ACTUAL TESTS PROVE IT WORKS

The highest yielding field of corn in the United States was planted to a blend similar to this. Our tests and the thousands of farmers who have used it the past three years ALL REPORT YIELDS OF FROM 6 to 8 BU. PER ACRE MORE than with just one variety of hybrid.

Can furnish a blend to suit your locality.

Weather-Proofed Blend A—For south half Iowa; southeast Nebraska; Missouri and central Illinois.

Weather-Proofed Blend A1—For north half of Iowa, up to Minnesota line; northeast corner of Nebraska, southeast South Dakota, also south half of Kansas.

Weather-Proofed Blend A2—For northern counties in Iowa, southern Minnesota, eastern South Dakota, also southwest Kansas.

SAME PRICE AS OTHER HYBRIDS

EDGE-DROP (Flat) GRADE IS COMMON FAVORITE

(Perfectly Uniform)

This is the grade everybody knows. Most farmers plant it as only a few realize the extra savings of planting Hill Drop and have switched to it.

All Perfectly Uniform

Every kernel is perfectly graded for thickness, length of kernel and width of kernel. Only uniform corn that will run smoothly through your planter with no trouble is sold. Our grading equipment in our three hybrid corn plants is absolutely the most up-to-date there is assuring you of the best grading possible to obtain.

Edge Drop Supply Short

The supply of edge-drop this year was seriously cut down. If you put off ordering too long, we may not be able to furnish you with edge-drop in the number you want, so please order early.

PLANT HILL-DROP GRADE AND SAVE YIELDS AS MUCH ...

Costs You \$1.50 bu. Less (Perfectly Uniform)

Most farmers plant flat kernel corn and don't know the advantages of hill drop corn. That's the only reason it's cheaper.

These small round kernels make the same or better corn than the flat kernels—the only difference being they weren't squeezed on the ear as much as the flat kernels. All are graded to be perfectly uniform in size and will plant as easily in your planter (with hill plates) as edge drop corn.

Hill Drop Stands Cold Better

Being small and round, they plant more acres per bushel. And, as they have more food in the kernel, they nourish the young corn plants better than small flat kernels, thereby giving you a stronger stand. It stands cold weather better, too.

Hill Plates Cost Only 60c Ea.

Plates to plant hill drop as uniformly as edge drop are readily available at any dealers. Cost about 60c ea. You save much more than that on only 1 bushel, and after that your saving is "velvet."

STATE NUMBERS CHEAP— IF YOU WANT THEM

\$3⁷⁵ Per Bu. and up

Yes, we have State Certified hybrids, too. Some seed houses sell these exclusively as they have none of their own and state-hybrids are available to everyone. We ask LESS FOR THEM as we feel Mule-Hybrid is far superior. It takes 5 years to get a breeding-improvement incorporated into a State Certified corn whereas with Mule-Hybrid we can add these improvements right away and we do. This puts Mule-Hybrid years ahead of State-Hybrids in these improvements.

However, some State numbers have made good showings and some farmers still plant them. We have about as complete a list as anyone and at prices WAY BELOW WHAT IS USUALLY ASKED.

U. S. 13—Good Reid Yellow Dent type, single ear, deep kernel. Best suited to rich soil. Large diameter ear. Edge, \$6.45; Hill, \$5.00.

130 Bu. per Acre—Drew Visitors
"Dear Henry: We sure had fine corn bought of you this year and many came to look at the MULE HYBRID. It made 130 bushels per acre but the high water spoiled some of it later on."—Mary Campbell, Rt. 1, Box 9, Tower Hill, Ill.

Mule-Hybrid Beats by 10 Bu. per Acre
"Dear Henry: I planted MULE corn 129 (two ears on a stalk) and Blend A, also DeKalb, U. S. 13 and will say MULE corn has got them all beat for quality and yield. It is standing much better and making 10 to 15 bu. to the acre more than other hybrids I planted."—Don Menshall, Spickard, Mo.

Mule-Corn Mostly Corn—Not Cobs
"Dear Henry: I husked and cribbed and shelled 840 bu. of corn from 92 rows 80 rods long of MULE HYBRID No. 116. Also when shelling this corn the drag chain that was run in slowest gear and then the chain full of corn not dare to keep the shovels could cause the auger in grain spout could not handle the shelled corn. In other words, Mule Hybrid was mostly corn and few cobs—this shelling of corn can be verified by James Bunda, Rt. 1, Ft. Dodge, Ia., who has a sheller and shells all over first time that this has ever happened in years of shelling."—Adolph Gross, Rt. 1, Ft. Dodge, Iowa.

91 Bu. per Acre with Mule-Hybrid

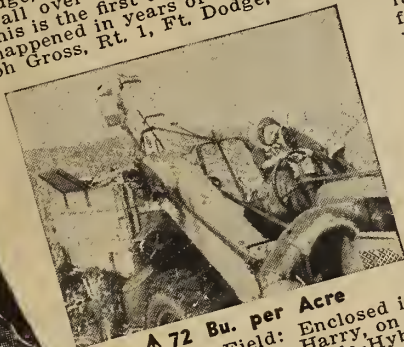

"Your Mule-Hybrid is the finest corn I ever planted. It stands up nice, ears are on the stalks where a farmer wants them. I made over 91 bu. per acre (field run) with your 116 and want it for all my acreage next year."—A. Schoen, Storm Lake, Ia.

A. Schoen of Storm Lake made over 91 bu. per A. (field run) with our 116 this year.

My 129S Beat 13 Other Hybrids
"Dear Henry: I am sending for some each of 129R and 129S as shown on order blank which send at once. This is my fourth year and your Hybrid has always been best. Last year I had 13 different kinds of Hybrid and your 129S made 9 bu. more than the next best. It made 109 bu. per acre."—H. J. Stindman, Gilliam, Mo.

Mule-Hybrid 90 Bu. per Acre
"Dear Henry: I planted the bushel of No. 116R on a 10 A. field of free plowed sod, finishing the piece with another well known hybrid. I planted it on May 2nd and it came up a perfect stand in spite of cool, damp weather. We had nice rains until June 18th when I cultivated the last time. Then we had hot, dry weather with no rains to speak of until August 16th, by that time this corn was too far along for any help. I began cribbing this corn on Sept. 27th, as dry as could be. The ears average from 11 to 13 in. long and they are all that way. I put 950 bu. in the crib from this 10 A. and I figure if it had all been your corn the acreage would have been well over a hundred bu. per A. as the other corn was not quite as good."—Mr. Robert Terwilliger, Rt. 1, Humboldt, Ia.

72 Bu. per Acre

"Dear Mr. Field: Enclosed is a picture of my son, Harry, on the picker in a field of Mule-Hybrid. We had turned the hogs in and then went over it with the picker and got 72 bu. to the acre and there is still a lot on the ground that hogs had pulled down. 4 or 5 neighbors have bought seed corn from you because I had with Mule-Hybrid."—Jacob Nolda, Crystal Lake, Ia.

121 Bu. per Acre in Illinois
"Dear Henry: I ordered one bu. of MULE HYBRID and planted it on our peat ground and it is running around 121 bu. per A. Ferris corn planted alongside of it runs about 80 bu. to A. Have tried your 116 too, but I believe that your No. 129 is what we should plant."—H. B. Knowlton, Sheffield, Ill.

101 Bu. per Acre in Kansas
"Dear Henry: Last year I purchased one bushel of Hybrid seed corn No. 129R and I want to tell you what wonderful results we had. We got a perfect stand. Cultivated 4 times and gathered 101 bushels per A."—M. M. Baker, Garden City, Kansas.

Mule-Hybrid Best in County

"Dear Henry: The No. 129 MULE HYBRID corn I got last spring is the best in Clay County. Got 10 ears 11 lbs. off 4 stalks including them on the stalks just to show you we can raise it in Missouri. Mule-Hybrid Best in Idaho Valley
"Dear Henry: I bought 2 bu. of your 116 Mule-Hybrid this spring and it's O.K. Just like you said it would be. I told a big seed man here in Weiser I had bought some Hybrid in Iowa and he said it wouldn't make me anything. I was discouraged, but didn't want to throw the seed away and now I can show him corn as long as your arm. Believe it safe to say there was not better corn in the valley than your Mule-Hybrid. Making better than 100 bu. per A."—Grant W. Weber, Weiser, Idaho.

INTERESTING FACTS ABOUT FIELD'S FAMOUS MULE-HYBRID CORN!

Over 2,000 well-isolated acres are needed to produce Field's Mule-Hybrid corn.

All Mule-Hybrids, before they are approved for sale, must pass vigorous tests for years to be sure they are:

- High, sure yielders
- Cold resistant
- Disease resistant
- Drought resistant
- Lodging resistant
- Uniform, easy pickers
- Non-suckering.

Farmers in 15 states plant Mule-Hybrid every year.

Field's were the first to cut the unreasonably high prices most producers were asking for hybrid corn.

Field's dust every kernel of Mule-Hybrid with a special corn dust to hasten germination and help prevent damping off and molestation by rodents.

Every lot of corn must test 94% or better or it is not sold. Test it yourself. You're the judge of whether it suits you or not.

Over 250 men were engaged in producing Field's Mule-Hybrid this year.

Henry Field has many new inbreds valued at \$100,000 to produce Mule-Hybrid.

Henry Field also sells State-Certified hybrids at prices way below what seedsmen who have no hybrids of their own ask for them.

Henry Field has a hybrid adapted to every kind of soil and climate condition. The fact his corn is grown in 15 states proves this. If you're not sure which corn to plant, Henry Field will be glad to advise you free.

To prove freight on corn isn't expensive (as some agents will tell you), Henry Field will pay the freight for only 25¢ per bu. anywhere in Iowa, Mo., Kans., Ill., Minn. and Nebr. 50¢ per bu. anywhere else.

Buying DIRECT from Henry Field, you save for yourself the agent's commission which sometimes amounts from \$1 to \$3 per bu. for every bu. of corn they sell you. Think of it!

I harvest every bit of our lawn seed. One of the biggest harvesting operations in the world. I know where every hit of my seed comes from and it's all from northern, hardy, clean fields. Don't pay for weeds. Buy direct from headquarters and get a lawn for your work.

HOW TO HAVE A GREEN LAWN QUICK

Get out real early in the spring. rake your lawn good, sow your seed and roll it in with a heavy roller, or rake it in LIGHTLY and tramp it in solid.

Sow 1 lb. for every 200 square ft. of new lawn and 1 lb. for every 400 square ft. of old lawn (to thicken).

NOTE: EARLY SEEDING IS IMPORTANT. IF YOU LIKE, SOW YOUR SEED ON THE SNOW. The freeze and thaw WILL WORK IT IN the soil for you.

FIELD'S NEW HYBRID ELM

Has All the Good Points of Both the American Elm and Chinese Elm—None of the Bad

The Perfect Cross for Shade Trees

No finer cross could be made for a shade tree than to combine the permanence and beauty of the American Elm with the rapid growth in all kinds of weather of the Chinese Elm. That's just what this new HYBRID ELM has done. It carries all the good qualities of both and none of the bad.

Resembles the American Elm—Perfectly Symmetrical

But the best part of the story is that it is almost impossible to tell the Hybrid Elm from the very desirable American Elm we all love so much. Its leaves are very large, dark green—almost exactly like the American. The bark is smooth and a medium grey color. The branches are identical to the American Elm—straight and strong—not gnarly and fine as with some trees. It does not break in a high wind. The trees are all perfect and symmetrical.

Grows 8 to 14 Feet Per Year!

The growth of this new Hybrid Elm is phenomenal. It has this habit from the Chinese Elm, but has far outstripped it. Records on some of the trees show they have grown as much as 14 feet in one year and 12 feet per year is not unusual. The growth is all straight and strong and perfectly shaped. It requires very little, if any pruning.

It Is 100% Hardy

Hot weather, cold weather—it's all the same to this new Hybrid. Not even the tips of the branches were hurt in the Armistice Day freeze in 1940 which took so many of our trees here in Shenandoah. Where ordinary varieties killed out, the Hybrid Elm was not hurt the slightest. And hot or dry, the growth doesn't stop. This elm is going to grow despite everything.

Limited Supply

There are no more trees available in the United States when our limited supply is exhausted, so I urge you to please reserve the trees you want as early as possible.
